

Nuvola / Pergola 3,5x4 Design /

Nuvola, designed by EMU D&S Lab, is a shading system with a linear and transversal design that defines, furnishes and protects outdoor residential and contract spaces. The adjustable directable blades can be regulated at will and the lighting system with the possibility for built-in LED lights make this collection perfect for every occasion and any time of day. Moreover, the optional curtains can be opened and linked together to provide total shading and privacy, or else gathered around the side poles for a more defined look.

Materials

Aluminium

Aluminium alloys, particularly suitable for cold-working and for die-casting, appropriately treated to withstand the elements and powder coated.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter.
