

Shine / Square table Hpl top 79x79 Design / Arik Levy

Made entirely of aluminium, Shine collection by Arik Levy offers modern essential lines, mainly intended for contexts in the Residential and Contract Hospitality sectors. The combination of truly creative design and aluminium conveys a sensation of both lightness and essential comfort. Armchairs, chairs and lounge chairs are all stackable and have teak armrests. The tables have a teak or HPL (white) top. The Shine collection also includes stools and high tables for furnishing dining and relaxation areas. In addition to the furniture already presented at the 2014 fair, a sun lounger, a daybed, a new set of fixed and extensible tables, and a two-seater sofa are included.

Description

Code: **254+256**
Typology: **Fixed**
Collection: **Shine**

Static Load: 100 Kg
Shape: Square

Technical Info

Width: **79 cm**
Depth: **79 cm**
Height: **74 cm**
Weight: **13.60 Kg**
Static Load: **100 Kg**

Packaging

Packages: **2**
Pieces for pack: **1**
Dimensions: **63x12x73 cm - 87x9x87 cm**
Volume: **0.123 mc**
Polyethylene bag and cardboard box

Materials

Aluminium

Aluminium alloys, particularly suitable for cold-working and for die-casting, appropriately treated to withstand the elements and powder coated.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter.

HPL

Self-supporting material suitable for outdoor exposure. It consists of layers of kraft paper impregnated with phenolic resins and of a decorative surface layer impregnated with thermosetting resins. These layers are pressed at 9 Mp and at a temperature of 150 degrees centigrade.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter.

HPL laminate is easy to clean and does not require special maintenance. Most stains can be washed with just clean water and dried with soft and clean cloths. For stubborn stains, use a sponge and a specific detergent for laminates or detergents for glass surfaces. Remove all traces of detergents using a dry cloth to prevent streaks or dulling. We recommend trying all products in hidden corner. Avoid using steel wool pads, products containing abrasive creams, powder detergents and acetone.
