Baobab

Collection

By Resol Studio

Baobab is a new generation of configurable tables inspired by the African tree of the same name, which can be adapted to both outdoor and indoor spaces. The table system is based on a polyethylene base structure manufactured using rotational molding technique, upon which rests the tabletop with rounded shapes and beveled profile.

The result is a completely organic design, very easy to install and transport.

Available in three heights:

- **Baobab L**, 110 cm high table
- **Baobab M**, 74 cm table.
- **Baobab S**, 43 cm low table, with the possibility of configuring it as a stool.

Woody

Collection

By *Josep Llusçà*

The entire family exudes a subtly vintage air and offers a balance between essential concepts such as **lightness, functionality, ergonomics,** and respect for the environment.

One of Resol's best-selling collections is undoubtedly Woody, designed by Josep Llusçà.

The family is expanded with the lounge chair version, a generous armchair that maintains the same aesthetic of the backrest inspired by the classic wooden slat chair.

The new lounge proposal has a width of 70 cm and the seat is at a height of 39 cm, making it intended as a resting option.

This new element is accompanied by the option of a double cushion, for seat and backrest, offering an extra level of comfort.

Bini

Collection

By Joan gaspar

The Bini family grows with the addition of a new element: **the stool**. This collection, designed by Joan Gaspar for Resol, is available in chair and lounge chair options, forming a set if desired with the option of a table or low table depending on the chair's height. It follows the same aesthetic, inspired by cane chairs, retained in memory over the years but revised.

Now the possibilities of furnishing a space are endless, as with the addition of the stool, the entire range is completed.

Available in **two possible heights**, for the kitchen and for bar counters, and follows the same aesthetic as the entire collection.

Colors

Two built-in kitchen appliances, likely ovens or a combination oven and microwave, are integrated into the light wood cabinetry. A white and black checkered towel is draped over the right-hand unit.

A long, white countertop island with a built-in sink and a modern, curved faucet. A warm, orange-toned LED light strip is installed under the countertop. On the counter, there is a dark, shallow bowl and a white bowl containing several oranges.

Two light green, modern-style bar stools with a curved backrest and a four-legged base are positioned at the end of the white countertop island.

A large window with a white frame, offering a view of lush green trees and foliage outside. On the windowsill, there are several small bottles and a small potted plant.

Two modern, oval-shaped pendant lights with a textured, grey finish and a warm glow are suspended from the ceiling.

The floor is made of light-colored wood planks, arranged in a horizontal pattern.

Hub

Collection

By Joan Gaspar

Hub collection is a new table collection designed by Joan Gaspar. The new proposal offers different table top sizes in three different heights with the aim of expanding the catalog's offer.

Hub is a design characterized by its unpretentious, tranquil, and timeless aesthetic. **"Hub is a table system designed as a meeting point for people, which pairs perfectly with any type of chair"**, explains its designer, Joan Gaspar.

The formal continuity of the Hub collection allows its models to complement other Resol furniture collections perfectly, such as Bini, Woody, Lisboa, among others.

Hub is a collection of tables available in three heights, with a discreet aesthetic. The high Hub table has a **hook for hanging bags**.

Rest

Collection

By Josep Llusçà

In the Rest collection we aimed to achieve a natural, timeless, and updated image of a revisited classic.

Minimalist and refined aesthetics, but formally expressive, soft, warm, friendly and homely that provides a great sense of comfort.
