

# prism

design:  
Krystian Kowalski  
2014

'Prism' chair is the latest product by Noti designed primarily for contract use. 'Prism' designed by Krystian Kowalski, uses the language of geometry, which - being analogous to grind gemstones, is associated with elegance. Prism is a quality product, made in the technology of foam injection, guaranteeing comfort and durability. The usage of best quality fabrics enriched with stitching detail proves the high quality and crafty finish. The chair is available on three types of bases - two aluminum bases , as well as wooden legs made of beech wood. Thanks to the diverse functions depending on the chosen base, 'Prism' chair is ideal for both office spaces and hotels or restaurants, and 'Prism' on wooden legs can also be used in private homes.
