SUSTAINABILITY

Klera is created entirely in aluminium, completely recyclable material and having minimum environmental impact. The scrap resulting during working is immediately put back into the production cycle, therefore, nothing is wasted. The modularity of the system also allows for an effective and soundproof disassembling of each single component which can therefore be maintained and substituted without having to replace the complete chair and, at the end of the life cycle, be separated and sent to the respective source for reuse or recycling.
