

tritos modular

design:
Piotr Kuchciński
2014

TRITOS Modular is a variation of the classic contract proposal by NOTI – complementary to the TRITOS collection designed by Piotr Kuchciński. The change is the original reshaping of TRITOS sofas and thus the arc-shaped modules can form a semicircle, $\frac{3}{4}$ of a circle or a wavy line. Screen walls are a part of this collection, which may be an integral part of the sofa, or as a self-standing screen which separates a chosen space from the rest of the room. It is possible to order the screen walls upholstered or with a white board on the inner part of the structure.
