The Architect's Toolbox

Smart, customisable
furniture solutions that
work anywhere, anytime.

We are made to be different

De Vorm offers a bespoke furniture formula for interior architects, supporting them to create custom concepts for public and community spaces. Always sustainably produced and compliant to ever-evolving regulations.

Discover De Vorm's revolutionary approach to furniture design. Tailor every element to your architectural vision with our sustainable, customisable solutions. Join our virtual showroom tour and turn your creative concepts into reality. Redefine space with furniture that adapts to your ideas.

[book your virtual tour now](#)

For too long, the furniture industry has been dominated by design heritage, restricting architects to specific dimensions and expensive bespoke work.

We believe furniture has the potential to serve an architects' vision, not guide it. We aim to build the ultimate architect's toolbox — where every architect can create custom furniture solutions at scale.

We researched iconic chairs to define the most comfortable spine, and reshaped production processes to offer a furniture formula — together, they form a solid foundation for your imagination. Fueled by a sustainable drive to change, we build smart furniture solutions that work anywhere, anytime.

Pick the color, shape, combination, and finish you need to bring your spatial vision to reality. Show us your ideas to spark conversation and connection, and we'll make it happen.

Made to be Different
De Vorm

Collection

Hale

Series

Hale was inspired by a classic school chair – simple, functional, no-nonsense. Made from PET Felt, the seat and backrest have a soft texture and gently curved shape granting outstanding comfort. Combined with a slender steel frame, few elements grant Hale its clean expression yet surprisingly extensive functionality. This series of chairs is easily stackable and fully customisable in colours and materials, making it suitable for various interior settings.

Innovative educational concept

Alemannenschule
Wutöschingen

Photography
Valentina Verdesca

Location
Wutöschingen, Germany

The Alemannenschule Wutöschingen is the winner of the German School Award 2019 and stands for an innovative educational concept. This school has no teachers and no classrooms and is considered one of the best high schools in Germany. The 400m² double height co-learning area is the functional and symbolic center of the space. It is the heart where collaboration takes place. The soft, round shapes of the customised furniture, the cosmic lighting installation, the vibrant colours, various sitting options as well as the mandala like art wall are all catering towards stimulating the psychological and physical comfort of the user group.

The LJ series consists of four chairs and stools, each with its own function. The curvilinear PET Felt seat and straightforward bent metal frame result in a design that is both functional and aesthetic. The chairs provide an ergonomically curved seat and back support for outstanding comfort. Designed to be fully customisable, LJ series allows you to create a perfectly matching seating for any space and need.

Workspot

Location
Rotterdam,
The Netherlands

The new interior of the Verdant project in the Weenatower Rotterdam blends form and function, creating a comfortable and unique space that is both aesthetically pleasing and practical for daily use.

The round architecture of the building was an inspiration and is highlighted by incorporating curved lines and rounded edges into the design, creating a contrast with the straight lines and angles of the usual office spaces. De Vorm's PET Felt furniture helps to provide a warm and inviting ambience, enhancing the overall atmosphere of the interior.

Twist

Series

With its no-nonsense functionality and versatile appearance, Twist stools meet the needs for occasional seating in social spaces. The tubular steel frame adds a notion of lightness, while the subtle curvature of the PET Felt seat offers proper seating comfort. Thanks to their light weight and double-sided grip, the stools can be stacked when extra space is needed, and easily moved around to adjust the setting to your needs.

Pod

Privacy Chair

Designed with privacy in mind, Pod chair grants a sense of seclusion and extensive seating comfort. The embracing PET Felt shell has a pleasant soft texture and a subtle sound-dampening effect. Combined with an elegant ash frame and two upholstered cushions, they create a unique expression making the chair a true eye-catcher. Pod solves privacy issues in breakout areas, hotel lobbies and lounge zones. It comes in eleven unique PET Felt blends with many options for frame colour and upholstery.

Nook

Lounge Chair

Nook is a generous lounge chair that embraces the need for privacy within social settings. Its distinctive shape is determined by a PET Felt shell granting the chair its soft and inviting expression. An insert in the shell accommodates an upholstered cushion for a superior level of comfort. Enveloping the shell from the rear is a slender steel frame that holds everything in place, outlining the chair's original form. Nook is suitable for hotel lobbies, lounge zones and waiting rooms. Choose from eleven PET Felt blends and numerous options for frame and upholstery.

Mino

Modular System

The elegant and multi-functional design of the Mino makes it the perfect choice for various environments. This modular sofa effortlessly adapts to any space, whether in professional settings, such as offices and public spaces, or more relaxed environments such as hotel lobbies and restaurants. Equip your Mino Sofa with a sleek side table or add a Bachmann PIX power supply unit to charge devices. These extra options enhance the functionality and modern look of the sofa and can be added afterwards. Also, you can combine the sofa with the Pico coffee table, specifically designed to fit the Mino series.

Big

Modular Table System

One system, endless design possibilities. Big series can be configured to the exact needs of your space. Thanks to its smart modular frame, this table system comes in three standard heights and can take extensive sizes with a minimum amount of legs. Make it as large as you want, choose your own finishes and customise the tabletop shape to match any context.

Big Round

Modular Table System

Big Round offers endless design possibilities in every sense of the word. This smart table system features a modular frame allowing to take large diameters on just three legs. Bring a sense of equality to any meeting or dining setting with an inviting round tabletop available in a wide selection of finishes.

MG

Series

MG Series consists of four functional tables that have a clean and modest appearance. Three tables with distinction in size — and therefore in function. The squared tabletop made from high-quality wood veneer has a soft appearance due to the rounded corners, whilst the powder-coated steel frame gives the side table a robust touch. The tables can be used in various settings such as offices, restaurants and bars.

Unique brand experience

Architects
Gensler,
Hollandse Nieuwe

Location
Amsterdam,
The Netherlands

Gensler and Hollandse Nieuwe translated the brand story of a global sports company in Amsterdam through clear visual language and user experience. A black and light grey base is enriched with fresh colours and graphic elements. Located in Amsterdam, it offers a unique brand experience across 24.500 m² of office space. A black and light grey base is enriched with fresh colours and graphic elements. The new campus is designed to support activity-based working, offering multipurpose for agile and hybrid working styles. De Vorm's LJ and Hale seating solutions were incorporated into the meeting centre and other social areas of the campus.

Pico

Coffee Table

The Pico Coffee Table offers an inviting, elegant expression and smart functionality. Its appealing, round tabletop and sleek metal frame are complementary for any setting, from lobbies and halls to offices and hospitality spaces.

Mute

Series

Pleasing to the eyes and comfortable to the ears. Mute series offers versatile acoustic solutions for any place and need. Made from PET Felt, the family ranges from wall panels to room dividers, offering a distinctive soft texture and many design options. Functional and aesthetic, Mute series will solve acoustic issues without compromising the looks of your interior.

AK

AK 1,3,4 Design by De Vorm
AK 2 Design by Ivan Kasner + Uli Budde

Series

AK series offers functional partitioning solutions with a soft and inviting appearance. Ranging from desk screens to room dividers, the family demonstrates great sound-dampening properties thanks to the PET Felt shell and sound-absorbing filling. Adding acoustic comfort and visual privacy to any office, hospitality or public interior.

Fost

Series

With its generous dome shape and graphic expression, Fost Series offer a combined solution for acoustics and illumination. The PET felt lampshade has a soft texture and a bold ribbed pattern on the outside, while the inner surface features contrasting white fabric. Enveloping the LED module, the fabric gently disperses the light down, granting an inviting sensation of privacy and calmness.

Covage

Photography
Jared Chulski

Location
Paris, France

In the heart of Trinity Tower, which has been awarded as the best office tower in the world, Sowen Group has been asked to design the interior for telecom company COVAGE's (Altitude Group) - an impressive 6,000m² office space. Trinity is an architectural challenge and a tower designed to be lived in. Respectful of its surroundings, Trinity provides an open, inviting and inspiring space for residents. LJ series, Lite tables and Fost are coming together in the complete interior. This makes it possible to create unique and personal atmospheres in line with the client's DNA. The durable material and modern design fit perfectly into COVAGE's office environment.

Ratio

Series

Recognisable by their compact and sleek design, the Ratio series offers a new take on classic metal lamps. Three pendants feature a spun steel shade with a seamlessly embedded LED module. Due to their similar outline design but distinctive diameter-height ratio, these lamps can be easily combined to create a playful and captivating setting. A timeless and functional addition to any interior, from offices to hospitality settings.
