

Maggiore / Sunshade 6x6 Design / Christophe Pillet

Test
UPF Rating 50+

Piazza Maggiore, designed by Christophe Pillet, is a maxi-sunshade available in two different sizes: 5x5 and 6x6 to cover areas between 25 and 36 square metres. Its large dimensions make it ideal for use in contract settings where it can accommodate numerous tables and chairs, in addition to a cushioned base that doubles as a comfortable dining seat. It is the ideal solution for the hospitality, also thanks to the quick and simple opening and shutting mechanism and specially designed internal levers. The sunshade is available complete with dimmable LED lights, a windproof system and high-tech aluminium joints.

Materials

Aluminium

Aluminium alloys, particularly suitable for cold-working and for die-casting, appropriately treated to withstand the elements and powder coated.

Maintenance: To keep the product in good condition for a long time, we recommend cleaning it regularly; more often in very damp locations with a marine climate. It is recommended to clean the surfaces using a soft cloth with water or mild detergents. Prolonged and continuous exposure to intense UV radiation or very low temperatures can affect the initial characteristics of the coloured coating, which is made from polyester. We recommend cleaning and storing the products in sheltered places during prolonged periods of non-use and during the winter.
