INFORMATION

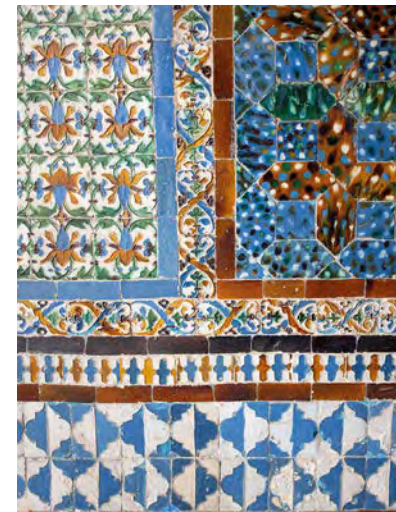

WELCOME

We propose a different way of looking at the workspace. Our aim is to inhabit the workspace. We would like to feel the office, a place with personality and strength that welcomes you with open arms. We would like to show you our home, our essence and our esPattio through which we know how: our products. We would like to inspire you with our identity, with our way of life, with our diversity. Welcome to your new office. We hope you feel right at home.

LIGHT, COLOUR & WARMTH

The wonderful southern light gives us a different vision of things, inspires us through our path towards creativity and design, and enlighten us towards a more human office.

Alhambra, Ubrique, Atlantico, Oliva... an impressive colour palette that reminds us of places, feelings and a unique essence. And finally, the southern warmth that makes up our identity and hospitality. Get to know our way of inhabiting the workspace. Come to esPattio.

About the price list

General Information

esPattio's pricelist is interactive. You can browse through the buttons and links to get to know the ranges, products, finishes, etc. until you get to the configuration of the furniture that is closest to your needs.

Collection

Our general index shows you all the Furniture ranges available. Click on one to Access the pricelist of the indicated range.

A SIGN OF AFFABLE SOLEMNITY INVITES AN EMBRACE OF LARGENESS AND SENSITIVITY

Identity and class are diluted in a tapestry at once frugal, daring, traditional and modern. Marina supports the harmonic sigh that fills the spaces without flooding them; that stirs the soul without tormenting it.

Chair, armchair and sofa

The metal structure is made up of 4 steel tube legs of Ø 22mm. The backrest is surrounded by a Ø18mm steel tube on the horizontal grill and a 3mm thick and 45mm wide steel plate. The internal structure or chassis is made up of a Ø11mm steel rod and folded steel plates for fixing to the main structure.

The finishes of this structure, with epoxy paint, available in Pattio colors and floor support ends in both felt and plastic to choose from.

The backrest is made up of a main injection foam, cut foam at the back and a fabric cover with 100gr/m² fiber.

The seat is made up of a chipboard core of 6mm thick and PU injection foam, topped with a 100gr/m² fiber fabric cover.

Centre tables

The centre tables are made up of a Ø30mm leg structure and a 4mm thick cylinder steel plate. The structure finish in epoxy paint in Pattio colors and floor support ends in both felt and plastic to choose from.

Table tops made of 23mm thick European oak veneered MDF board or matt black lacquered MDF board.

Certificate

Our products are designed, manufactured and distributed according to current regulations and organizational standards.

Life cycle analysis

PMA03

Raw Materials	kg	%
Steel	9,01	66
Upholsteries / Filling materials	3,35	24
Plastics	0,01	1
Wood	1,28	9

% Recycled Mat.= 10%

% Recyclable Mat.= 76%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Powder painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents.

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies use, reducing the CO2 emissions (Photovoltaic pannels).
- Energy saving measures in all production process.
- COV global emission reduction of the production processes by 70%.
- Powder painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

- Easy maintenance and cleaning without solvents.
- Pattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

- Easy unpacking for the recyclability or compound reuse.
- Piece standardization for the use.
- Recycled materials used for products (% recyclability):
- Aluminium is 100% recyclable. Steel is 100% recyclable. Wood is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

FLEXIBLE SPACES OF COLLABORATION

The range of Bow Lounge armchairs and sofa invites its members to feel comfortable, relax or work in a relaxed manner. Its soft, warm and welcoming aesthetic is motivating and, in this way, contributes to generate value and inspiration.

Armchairs

Shell

Both high and low backrest (two seat sofa is always with low backrest) versions have a strong metal frame made from 11 mm diameter cold rolled steel rods and steel support plates. This frame is then wrapped and injected with high density foam 70 Kg/m³. This base is then upholstered at various thickness, with at least a depth of 12.5 cm at the seat area.

Optional structures

- **4 wooden legs:** fixed structure with 4 legs made of varnished or lacquered beech wood. Each leg tapers from 4 cm to 3 cm at the foot. Bolt-on glides manufactured in black polyethylene with grey anti-slip are then added.
- **4 conical metal legs:** fixed structure with 4 legs made of threaded steel. Diameter of 1.7 cm in the lower part and 3.1 cm in the upper part of each leg. Black glides in low density polythene (PELD) are added.
- **Pyramidal wooden base:** crew-in swivel structure made of steel and covered with a varnished beech wooden case of 87.5 x 87.5 x h:31.8 cm. Plus polypropylene levelers.
- **Polished aluminium soft base:** swivel structure with 4 spokes made of injected aluminum with conical shape of ø 82.5 x h: 30.5 cm. Plus polyurethane glides.
- **Wooden legs for two seat sofa:** fixed structure with 4 legs made of natural beech wood that can be lacquered. The legs taper from 4 cm diameter to 3 cm diameter at the foot. The rear legs are made of steel and covered with a beech wood sheath. Black polyethylene glides are then fitted with a grey non slip attachment.
- **Forged structure:** structure with 4 steel legs made of 20x8 mm solid calibrated bar. Molded by traditional forging process with forge, riveted and welded to provide greater structural strength. Painted with epoxy paint and 100 micron micro-textured finish in Matte Black. Round ends finished in black 4 mm high.

COMFORT THAT ENCOURAGES CREATIVITY

Glove Lounge is a family of armchairs and soft seating tables designed for companies that generate value looking for motivation and collaboration among people.

Armchairs

Shell

High or low backrest with interior formed by metal frame of solid rod of cold rolled steel Ø11 mm and steel plates for the anchoring of the structure. The set is wrapped with an over-injected foam of high density 70 kg / m³ upholstered. Seating foam of 7 cm thick.

Optional structures

- **4 wooden legs:** fixed structure with 4 legs made of varnished beech wood that can be lacquered. Bolt-on glides manufactured in black polyethylene with anti-slip.
- **Pyramidal wooden base:** swivel and screw-in structure made of steel and covered by a wooden beech case of 87,5 x 87,5 x h:31,8 cm. Floor support with polypropylene leveler.
- **Polished aluminium soft base:** swivel structure with 4 spokes made of injected aluminum with a conical shape of ø 82.5 x h: 30.5 cm. Floor support with polyurethane glides.

Quilted pattern

Fabric layer made up of 3 elements: the selected fabric, 5 mm thick foam with a density of 60 Kg/ m³ and an interlining. These components are united by the pattern of the backrest. The colour of the thread used is the same as that used in the rest of the chair.

Certificate

Our products are designed, manufactured and distributed according to current regulations and organizational standards.

Maintenance and cleaning of products

esPattio provides recommendations to the user so that their products always look new and in excellent condition.

As a general rule, we recommend the use of environmentally friendly cleaning agents. Please follow the cleaning product manufacturer's instructions.

Life cycle analysis

SLGA2

Raw material	kg	%
Steel	8	65
Wood	2,93	24
Plastic	1,3	10,5
Upholsteries / Filling material	0,7	0,5

% Recycled Mat.= 15%

% Recyclable Mat.= 11%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Podwer painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents.

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies use, reducing the CO2 emissions. (Photovoltaic pannels).
- Energy saving measures in all production process.
- COV global emission reduction of the production processes by 70%.
- Podwer painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

- Easy unpacking for the recyclability or compound reuse.
- Piece standardization for the use.
- Recycled materials used for products (% recyclability):
- Wood is 100% recyclable. Steel is 100% recyclable. Aluminium is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

Dimensions

cm

Low backrest

High backrest

High backrest with headrest

These dimensions are the same for the whole product, regardless of the chosen base.

	Plain	Quilted
Low backrest	2,8 m	3 m
High backrest	3,1 m	3,3 m
High backrest + headrest	3,4 m	3,6 m

These minimum and maximum dimensions depend on the chosen configuration (armrests, bases...). Please consult if specific values are required.

AN ELEGANT AND TIMESLESS DESIGN

Pausa will inhabit the most value-added spaces in the office to generate synergies, promote socialization and offer a pleasant comfortable waiting area.

Upholstered platform

Beech wood platform

Oak wood platform

Oak wooden trim

Frame

Solid traditional beech or oak wood structure composed of beams and rectangular crossbars with rounded edges finished with two coned trapezoidal legs.

Platform

Union element between the frame and the rest of the components, it is a structure manufactured in 19 mm thick MDF covered with open-pore natural beech or oak wood veneer for sofas with a wooden platform, or uncovered, if you choose the upholstered option. Overlapping the frame is fixed through screws.

Seat

Made of natural wood, with a fitted elastic strap web. Over this lays a 100 mm thick polyurethane foam piece. Padding elements give the sofa great comfort. Finally completed by a removable upholstered cover with stitched edges, to facilitate easy cleaning. The seat is attached to the platform via removable fittings.

Backrest

Set of two pieces made of multiple polyurethane foam densities and wrapped in padded elements that bring the best support to the back. Completed by a removable upholstered cover with stitched edges, so that it can be easily cleaned.

Backrest support

19 mm thick MDF piece completely wrapped by high density polyurethane foam and upholstery. It brings support to the backrest cushions, providing the right orientation of inner padding. It is fixed to the platform via removable fittings.

Armrest

It has the same inner composition as the backrest support. The inner side, the one that is in contact with the user, has a padded reinforcement to ensure good ergonomics and comfort. It is fixed to the platform via simple removable fittings.

Wooden trim for backrest and armrest

19-mm-thick MDF trim covered in open-pore natural oak veneer and 1-mm-thick natural wood veneer thermofused edge all around. Completely varnished surface in line of planes by rollers with ultraviolet curing. Overlapping the backrest or the arm by means of screws to facilitate disassembly for maintenance.

Certificate

Our products are designed, manufactured and distributed according to current regulations and organizational standards.

Maintenance and cleaning of products

esPattio provides recommendations to the user so that their products always look new and in excellent condition.

As a general rule, we recommend the use of environmentally friendly cleaning agents. Please follow the cleaning product manufacturer's instructions.

Life cycle analysis

PPSJ2

Raw Material	kg	%
Wood	28,25	83,12
Upholsteries / Filling material	5,49	16,14
Steel	0,15	0,44
Plastic	0,10	0,29

% Recycled Mat.= 71%

% Recyclable Mat. = 83,56%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Podwer painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents.

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies use, reducing the CO2 emissions. (Photovoltaic pannels).
- Energy saving measures in all production process.
- COV global emission reduction of the production processes by 70%.
- Podwer painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

- Easy unpacking for the recyclability or compound reuse.
- Piece standarization for the use.
- Recycled materials used for products (% recyclability):
- Wood is 100% recyclable. Steel is 100% recyclable. Aluminium is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

THE AESTHETICS OF AUXILIARY FURNITURE

Brisa brings new airs of design and casual encounters among the people in the office. With an inspiring look and a wide range of products, these pouffes will fit any space, providing balance and functionality.

Poufs

Pouf made up of an interior structure of 15 mm thick bare chipboard (the seat cover is the only piece with 10 mm thick bare chipboard) rubberised with 20 Kg/m³ polyurethane foam and wadding. It includes a piece of 40 Kg/m³ polyurethane foam in the seat, which improves comfort. Finally, the two pieces that make up the pouf (body and seat cover) are upholstered in the full range of selected fabrics and assembled with screws.

In the case of including a wooden plinth, the lower part of the pouf is previously covered with a retor that covers the inside of the pouf.

Wooden plinth

Wooden plinth in machined beech wood, 40 mm thick and 85 mm high.

Optionally varnished beech or lacquered in all esPattio colours with adhesive felt glides.

Base

The base is a 15 mm thick piece of MDF, machined and black lacquered, with recesses for the polypropylene support pads.

Handle option

The smallest pouf (diameter 41 mm) can be fitted with an Ubrique leather handle for easy transport.

Structure with casters

12 mm tubular steel structure welded and painted in the full range of esPattio colours for Brisa.

Double polyamide wheels 38 mm diameter (5 pcs).

Electrification option

16A / 250 V ~ electrification unit with earth connection and 20 cm cable with GST18 connection.

The power cable is not included, order separately. Integrates into the wooden plinth of the pouffe (not available for pouffes with a diameter of 41 cm or without a plinth).

USB 2.0 port option

USB 2.0 port extension with rounded trim for connecting electronic devices (mobile phones, tablets, etc.). Integrates into the wooden plinth of the pouffe (not available for pouffes with a diameter of 41 cm or without a plinth). 2 meter cable with charger/wall plug.

5-year warranty

► [Warranty terms and conditions](#)

Maintenance and cleaning of products

esPattio provides recommendations to the user so that their products always look new and in excellent condition.

As a general rule, we recommend the use of environmentally friendly cleaning agents. Please follow the cleaning product manufacturer's instructions.

Life cycle analysis

PBRE2

Raw material	kg	%
Wood	9,4	80
Upholsteries / Filling material	1,9	20

% Recycled Mat.= 50%

% Recyclable Mat.= 67%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Podwer painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents.

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies use, reducing the CO2 emissions. (Photovoltaic pannels).
- Energy saving measures in all production process.
- COV global emission reduction of the production processes by 70%.
- Podwer painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

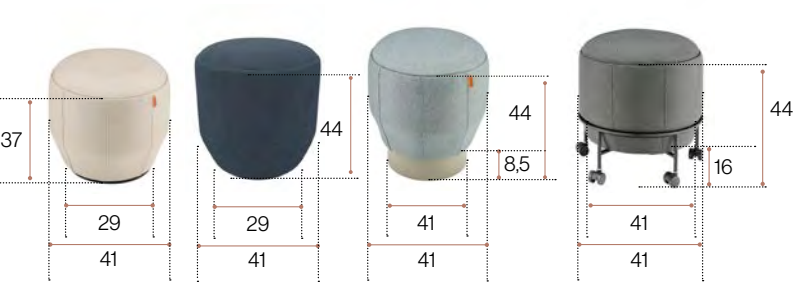

- Easy unpacking for the recyclability or compound reuse.
- Piece standardization for the use.
- Recycled materials used for products (% recyclability):
- Wood is 100% recyclable. Steel is 100% recyclable. Aluminium is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

CREATIVITY AND CASUAL REST

This product inspires creativity and flexibility and casual rest. A seat that can be moved to any space it is needed, again, harking back to home furnishings.

Pouf

Pouf composed of one piece of polyurethane foam with density 40 Kg / m³ and another piece of expanded polystyrene foam with 20 Kg / m³ coated with 100 gr fiber. It has a bare 16 mm thick particle board base.

The base is a piece of MDF 30 mm thick machined and lacquered in black with housings to stuff the support ferrules that are made of polypropylene.

Fabric handle to facilitate transport.

Certificate

Our products are designed, manufactured and distributed according to current regulations and organizational standards.

- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

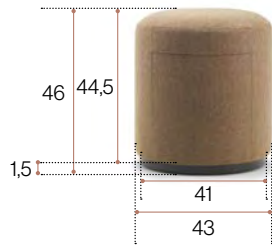

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

- Easy unpacking for the recyclability or compound reuse.
- Piece standardization for the use.
- Recycled materials used for products (% recyclability):
- Wood is 100% recyclable. Steel is 100% recyclable. Aluminium is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

Upholstered Bika

LIGHTWEIGHT AND AESTHETIC

The apparent simplicity of the Bika program hides an ambitious concept that brings together design and innovation, aesthetics and functionality. Designed by the Ramos & Bassols studio, its versatility is born from the combination of only two pieces that when combined build an extremely resistant chair but with a clean and light aesthetic.

Chairs

Indoor and Outdoor Polypropylene

4-legged chair without arms composed of two pieces, a frame and a seat-backrest sheet making a shell. The structural frame, of soft shapes, made of polypropylene (PP) supports the seat-backrest sheet.

The sheet that serves as a seat and backrest, is made of polypropylene (PP) and is framed by the frame transmitting a unique and fluid image to the chair.

The chairs have under the seat 4 stacking stops made of polyethylene (PE). Floor support with thermoplastic elastomer (TPE)

The composition of the outdoor chairs allows them to be used both in rainy or cold environments as well as in high temperatures or under the sun.

Its different finishing options together with the possibility of being stacked make this chair a dynamic and versatile product.

Upholstered Bika

- **Stripe:** The upholstered version of Bika has the same structure and shell than the polypropylene version. The front part of the backrest is covered with 40 mm Atlantic Stripe fabric, a 6 mm thick PU foam from the manufacturer Gabriel. This is a fabric with a particular visual effect. Its 3D texture and bulky touch offers the user a great comfort. The stripes are the most graphic element, and it is ideal for larger designs and surfaces. Meanwhile, the back side of the backrest is upholstered with the standard Atlantic fabric, also made by Gabriel.
- **Quilted pattern:** fabric layer made up of 3 elements: the selected fabric, 200gr fiber and an interlining. These components are joined by the drawing pattern of the backrest. The drawing pattern goes only on the front of the chair. The back is smooth upholstered.
- **Plain upholstery:** capa de tejido conformada por 2 elementos: la tela seleccionada y espuma de 5 mm de espesor de densidad 60 Kg/m³. Ambas piezas se unen entre sí mediante pegamento ecológico en base agua. Este pegamento libre de compuestos volátiles orgánicos (COV).

Upholstered Bika is not a stackable chair.

Options

The trolley for stack chairs is made of polypropylene injection mould, 99 x 58 x h:50 cm. It includes 4 casters, 2 of them with locking mechanism, made of galvanized steel sheet.

Certificate

Our products are designed, manufactured and distributed according to current regulations and organizational standards.

ABRIL OPENS A SEASON THAT RECONCILES POSSIBILITIES AND A DIVERSITY OF FINISHES

It reflects a nature devoted to contrasts, to a highly heterogeneous understanding. The Abril chair is designed to coexist unquestionably among pieces with interspersed aesthetics.

Armchairs

Shell

The Abril family is made up of three shell models: with arms, without arms and stool. They are manufactured by injection in polypropylene (PP) and mineral-filled polypropylene depending on the model and are offered in a wide range of colours.

Upholstered seat pad for shells with and without arms: the seat area can optionally have a cover made of 10 mm thick foam with a density of 30 kg/m³ and upholstered in the chosen fabric. This placket is overlapped, stapled and screwed.

Structures in option

- **4 metal legs:** fixed 4-leg structure made of ø 16mm and 2mm thick steel tube plus two ø 18mm and 2mm thick welded crosspieces, coated with epoxy paint in a wide range of colours. The fixing to the shell is hidden by some shadow gray rubberized stops made by injection. These stops on the chair without arms function as stacking stops. In the upholstered seat pad option, these stops are replaced by a stacking tray made of polypropylene I have injected in two colors. Round tips finished in black with the option of felt for wooden floors. This structure is compatible with shells with and without arms. Structure stackable in 4 units on the ground for the frame without arms.
- **Sled:** solid Ø 11 mm rod structure curved so that the ground supports are shaped like a sled skate. One on each side of the chair. The fixing to the shell is hidden by some shadow gray rubberized stops made by injection. These stops on the chair without arms function as stacking stops. In the upholstered seat pad option, these stops are replaced by a stacking tray made of polypropylene I have injected in two colors. Floor support with 4 ends made of black polypropylene with the option of felt for wooden floors. Structure stackable in 4 units on the ground for the frame without arms

- **Pyramidal wooden base:** 4-spoke swivel structure made of steel and covered by a beech, oak or lacquered beech wood cover. This base is attached to the casing through an aluminum injection part typical of the series, painted in epoxy and a steel cone covered by a trim. Floor support with black polypropylene leveler with felt option for wooden floors.
- **4 spoke aluminium pyramidal base:** Swivel structure with 4 spokes made of injected aluminum with a conical shape of ø70 cm and h: 30.8 cm with various finishes. This base is attached to the casing through an aluminum injection part typical of the series, painted in epoxy and a steel cone covered by a trim. Floor support with black polypropylene top with felt option for wooden floors or with wheels. The 50mm diameter wheels are totally black in the hard tread option and black with the soft tread in light grey.
- **4 metal legs for high chair and stool:** structure with 4 fixed legs in two heights, 750mm and 650mm, made of ø 16mm and 2mm thick steel tube plus two ø 18mm and 2mm thick welded crossbars with ø 12mm tubular footrest, coated with epoxy paint. The fixing to the casing is hidden by some shadow gray rubberized stops made by injection, these stops work as stacking stops. In the upholstered seat pad option, for the high chair, these stops are replaced by a stacking tray made of polypropylene. Floor support with round tips finished in black with the option of felt for wooden floors. This structure is only compatible with the frame without arms. Structure stackable in 4 units on the ground.

Pyramidal wooden legs

P13
Swivel chair
Aluminium flat legs

DETAILED SOFT SHAPES

The strength of Bow Chair lies in its design: a sympathetic aesthetic, detailed soft shapes and a great combination of floor supports: wooden pyramidal legs, 4 wooden legs, flat aluminum legs, sled structure, 4 conical steel legs and a pyramidal aluminum legs with or without wheels.

Armchairs

Shell

Backrest with or without arms with interior formed by a metal frame made of solid cold-rolled steel rod Ø 11 mm and steel plates for anchoring the structure. The set is wrapped in high-density 62 kg/m³ upholstered super-injected foam with variable thickness in the seat area with a maximum thickness of 12.5 cm.

Optional structures

- **4 wooden legs:** fixed structure with 4 legs made of varnished or lacquered beech wood. Each leg tapers from 4 cm to 3 cm at the foot. Bolt-on glides manufactured in black polyethylene with grey anti-slip are then added.
- **4 conical metal legs:** fixed structure with 4 legs made of threaded steel. Diameter of 1.7 cm in the lower part and 3.1 cm in the upper part of each leg. Black glides in low density polythene (PELD) are added.
- **Sled base:** Ø 11 mm curved sled structure.
- **Flat base:** polished aluminium flat base with 4 polypropylene glides. Rectangular section arms. 70 cm diameter base.
- **Pyramidal wooden Legs:** crew-in swivel structure made of steel and covered with a varnished beech wooden case of 87.5 x 87.5 x h:31.8 cm. Plus polypropylene levelers.
- **4 spoke base:** 4 spoke swivel structure made of aluminium with conical shape of ø70 cm and h: 30,8 cm.

Certificate

Our products are designed, manufactured and distributed according to current regulations and organizational standards.

Maintenance and cleaning of products

esPattio provides recommendations to the user so that their products always look new and in excellent condition.

As a general rule, we recommend the use of environmentally friendly cleaning agents. Please follow the cleaning product manufacturer's instructions.

Life cycle analysis

SBSC2

Raw Materials	kg	%
Steel	12,31	68
Upholsteries / Filling materials	5,802	32
Plastics	0,01	1

% Recycled Mat.= 5%

% Recyclable Mat.= 12%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Podwer painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents..

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies use, reducing the CO2 emissions (Photovoltaic pannels).
- Energy saving measures in all production process.
- COV global emission reduction of the production processes by 70%.
- Podwer painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process ans dangerous waste special treatment.

Transport

- Cardboard use opmitization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

- Easy unpacking for the recyclability or compound reuse.
- Piece standarization for the use.
- Recycled materials used for products (% recyclability):
- Aluminium is 100% recyclable. Steel is 100% recyclable. Wood is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

SIMPLICITY AND COLOR FOR A DIFFERENTIATING INTERIOR DESIGN

Bistró invites you to enjoy in company, share moments, hold occasional meetings, coffee breaks and all this with a simple but friendly aesthetic, full of color. A personal style based on the joy of collaborating and sharing our leisure time.

Tables

BISTRÓ

Tops

- **Wood:** 16 mm thick DM fiber board. Particleboard covered in natural european oak or single-colour lacquered wood..
- **Fenix:** phenolic top with a surface composed of new generation acrylic resins, hardened and fixed using an Electron Beam Curing process. Board thickness: 12 mm. Always black finish.
- **Dekton Tops:** it is the union of an upper surface composed of a sophisticated mixture of more than 20 minerals extracted from nature that result in an Ultra-Compact Technical Stone, and a lower bevelled base of lacquered particle board. Tabletop thickness: square tables 4 mm Dekton top + 16 mm lacquered top and circular tables 8 mm Dekton + 16 mm lacquered base. The lower base is always lacquered in the color of the structure.

Structure

- **Aluminium flat base:** structure: polished aluminium flat base with 4 polypropylene glides. Rectangular section arms. 70 cm .
The base is attached to a column composed of a tube and a connecting plate. The round tube is made of steel (50 x 2 mm), laser cut and welded a conical reinforcement for a correct fit with the base. A small plate is screwed at the bottom to ensure the connection between the base and the tube and the cover connection plate is attached to the tube using three screws. It comes in three different height to get H74, H100 and H110, depending on the table top.

LIGHT AND VERSATILE

Nota is a program of lightweight support tables that turns any area into a casual place for work, improvised meetings or relaxing. With a wide variety of finishes to choose from, Nota customizes environments with a warm and friendly touch.

Tables

Covers

- **Wood:** 16 mm thick DM fiber board. Covered by a porous wood veneer with chamfer. The edge and downside of the board have the same lacquered finish. Finished with in-line UV-cured varnish. Surface sprayed with a water-based ultraviolet product. 100% ecologic.

Structure

- **Fixed:** easy-to-assembly structure. 5 mm thick steel plate base, attached to a 32 mm long, 1,5 mm wide tubular steel mast. Aluminium injected linking piece attached to the mast that holds the cover with four screws. The whole structure is lacquered in the same colour and is delivered disassembled.
- **Adjustable in height:** structure that allows regulating the desk height through a threaded mechanism. It consists of a 5 mm steel plate base attached to a 40 mm diameter and a 2 mm thick extruded aluminium tubular mast.
The piston, made up by a 32 mm steel tube, is introduced and fixed to the extruded tube by plastic pieces that prevent the piston from sliding and rotating.
Aluminium injected linking piece attached to the piston, holding the cover with four screws.

Packaging

Single package with every part. Base, mast, linking piece and cover disassembled. Tight packing to prevent internal slippage of parts.
Total volume optimized to the maximum for transport. Always with the purpose of obtaining flat and stackable packages.

5-year warranty

Maintenance and cleaning of products

esPattio provides recommendations to the user so that their products always look new and in excellent condition.

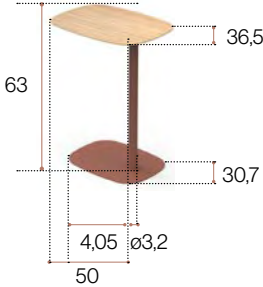

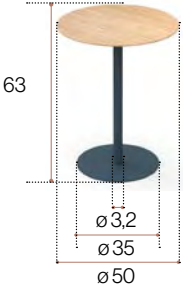

As a general rule, we recommend the use of environmentally friendly cleaning agents. Please follow the cleaning product manufacturer's instructions.

Aluminium	0,6	7,8
Plastic	0,2	2,6

% Recycled Mat.= 71,8%

% Recyclable Mat.= 95%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Podwer painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents.

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies use, reducing the CO2 emissions. (Photovoltaic pannels).
- Energy saving measures in all production process.
- COV global emission reduction of the production processes by 70%.
- Podwer painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

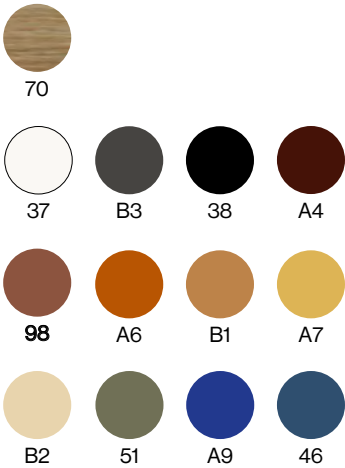

- Easy unpacking for the recyclability or compound reuse.
- Piece standarization for the use.
- Recycled materials used for products (% recyclability):
- Wood is 100% recyclable. Steel is 100% recyclable. Aluminium is 100% recycable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

SMALL, VERSATILE, FUNCTIONAL

Low tables provide support for casual meeting places and rest areas. The wide variety of styles and finishes available allows you to choose the option that best suits the interior design of the room.

Tables

BOW LOUNGE

**Tops**

- **Wood:** 23 mm thick DM fiber board. Particleboard covered in natural oak or single-colour lacquered wood..
- **Marble:** made up of a 20 mm thick natural marble top with black lacquered MDF board glued on the bottom to provide greater structural strength. Rounded edges and polished surface. Being a natural material, each cover is exclusive, having its own grain and tone. Available in Venato White and Marquina Black.

Structure

- **Wooden legs :** all wooden components are accurately and precisely machined. The structure is normally based on a cross section or a triangular format for strength and stability. The legs are inclined and tapered .All components and joints are glue spiked. Each table can be varnished or lacquered.
The tops of the tables are separated from the structures by means of conical aluminum bushes that act as spacers. The support legs have a felt finish to the floor.
- **Forge legs:** structure with 4 steel legs made of 20x8 mm solid calibrated bar. Molded by traditional forging process with forge, riveted and welded to provide greater structural strength. Painted with epoxy paint and 100 micron micro-textured finish in Matt Black. Round ends finished in black 4 mm high.
- **Wooden pyramidal base:** structure with pyramidal base of wooden legs that are fixed to a metal structure by means of screws that can be easily replaced. The legs are made of beech wood with a variable section geometry and can be lacquered or varnished. The support to the floor with glides, screwed and clipped to the leg with a felt finish. Fixing to the top using a metal plate and 4 screws.

- Piece standarization for the use.
- Recycled materials used for products (% recyclability):
- Aluminium is 100% recyclable. Steel is 100% recyclable. Wood is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

P8
Coat rack 550 (4 sticks)

P9
Coat rack 450 (3 sticks)

P10 Complements

AESTHETIC AND LIGHTWEIGHT

Tipi is a coat rack in which 3 very different functional elements are combined, forming a piece of great simplicity and capacity.

Coat rack

Structure

- **Sticks:** solid wood, available in beech or oak, with a diameter of 30 mm and a length of 194 cm. They can be combined in sets of 3 or 4 supports depending on the required capacity. The 4-support set is more hanger-oriented and requires more space, while the 3-support set is more practical in confined spaces.
- **Knot:** aluminium disc located at the intersection of the feet which acts as a link between the supports. The node is supplied in the same finish as the hoops..
- **Rings:** these are the elements that finish off the coat rack, providing the loading ring at the upper end and the hoop at the bottom that provides stability to the base. Available in two diameters, 570 for the 4-foot ones and 450 for the 3-support coat racks. The hoops are made of 11 mm diameter steel rod and are available in the range of 12 selected esPattio finishes..

Packaging

Packed in two items, one side with rods and the other side with rings and fittings. Tightly packed in boxes to avoid internal slippage of the pieces, optimising the total volume to the maximum for transport. Always with the premise of obtaining flat and stackable packages.

5-year warranty

► [Warranty terms and conditions](#)

Maintenance and cleaning of products

esPattio provides recommendations to the user so that their products always look new and in excellent condition.

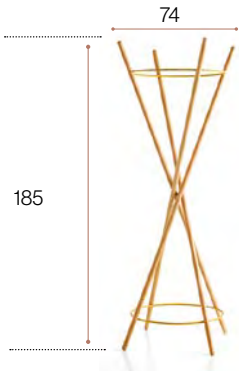

As a general rule, we recommend the use of environmentally friendly cleaning agents. Please follow the cleaning product manufacturer's instructions.

Aluminium	0,10	1,46
Plastic	0,01	0,12

% Recycled Mat.= 32,08%

% Recyclable Mat.= 100%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Powder painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents.

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies are used, reducing CO2 emissions. (Photovoltaic panels).
- Energy saving measures in all production processes.
- COV global emission reduction of the production processes by 70%.
- Powder painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimisation of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers' area reduction. Local market power and less pollution of transport.

Use

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardised and modular design.
- The boards with no E1 particle emission.

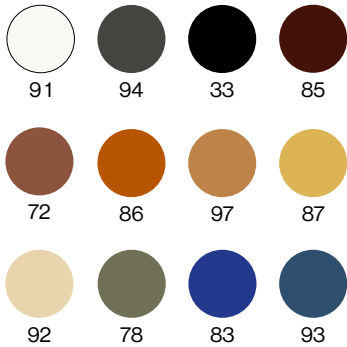

End life

- Easy unpacking for the recyclability or compound reuse.
- Piece standardisation for the use.
- Recycled materials used for products (% recyclability):
- Wood is 100% recyclable. Steel is 100% recyclable. Aluminium is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

IMAGE & WARMTH WITH BALANCE

Libro proposes a natural interplay with space to transform it into a zone with its own identity, with a dynamic aesthetic that overlays the substantial functionality of the program.

Structures

The structures are made of 12 mm diameter and 2 mm thick steel tube. These structures shape the shelving unit and are joined together by the boards and their corresponding bolts. Tube-to-tube connections are accomplished through TIG welding, ensuring strong connections and a quality finish synonymous with esPattio.

Shelves

The boards feature a 12 mm thick MDF core, available in oak finish or lacquered in different esPattio colors. They consist of shelves, each forming the levels of the shelves, including an optional continuous ceiling that helps accommodate height differences in the upper shelves of each unit due to potential uneven surfaces. Additionally, there are stiffeners that provide stability to the structure after passing 2 levels. The shelves have four bolts that allow for positioning these with the structures and uniting one structure to another, using quick clip nuts. These boards can support a weight of 1 kg/dm².

Baseboard

The baseboard comprises a 30 mm thick MDF core with a black lacquer finish. This board serves as the primary stability source for our structure, acting as a counterbalance to prevent possible tipping. The stability is reinforced by anti-slip levellers, which hinder movement on the floor and can correct potential unevenness, ensuring that the entire baseboard is at the same level.

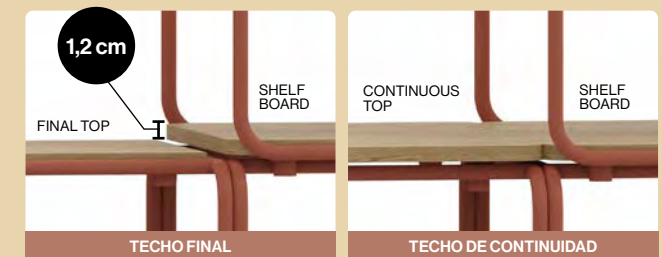

The union between bases will be done using two wooden dowels, which will guarantee collinearity between the bases.

Plastic Components

Plastic components house various elements, reinforcing the connection between unit structures, ensuring height continuity between the upper shelves of each unit in case of uneven surfaces, and fulfilling aesthetic functions like covering the bolts that join different structures.

Top

Choose a **CONTINUOUS TOP** to keep the shelves of adjacent shelving at the same height.

The CONTINUOUS TOP is 1.2 cm higher than the FINAL TOP.

Example for chaining shelves

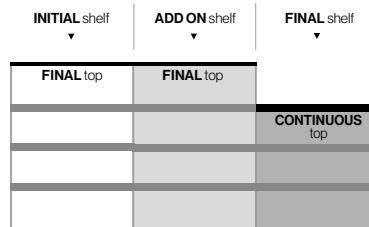

To achieve homogeneity in our chaining of shelves, we recommend always choosing **"FINAL TOP"** for the highest shelf or shelves in our composition. On the other hand, for the rest of the shelves that are below this maximum level of our composition, always choose **"CONTINUOUS TOP"** so that all the shelves are aligned. When chaining 2 or more shelves together, **you should always start with an INITIAL shelf and end with a FINAL shelf.**
To quote Libro with complex combinations, please consult our Technical-Commercial Department.

Combination 1

3 shelves combined

- 1 unit **PLB08 02** (Final top)
- 1 unit **PLB18 02** (Final top)
- 1 unit **PLB26 01** (Continuous top)
- 2 units **PAC01** Wall mounting kit

Position of screens
The add on shelf is reversible

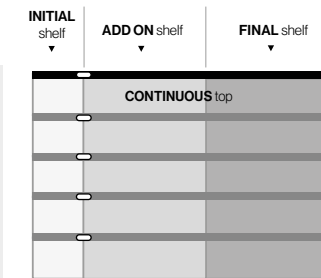

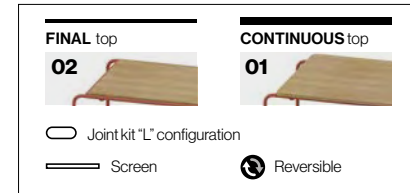

"L" configuration 1

3 shelves combined

- 1 unit **PLB10 01** (Continuous top)
- 1 unit **PLB20 01** (Continuous top)
- 1 unit **PLB30 01** (Continuous top)
- 1 unit **PAC03** Joint kit "L" configuration

Position of screens
The add on shelf is reversible

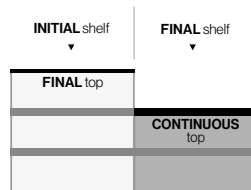

Combination 2

2 shelves combined

- 1 unit **PLB06 02** (Final top)
- 1 unit **PLB24 01** (Continuous top)

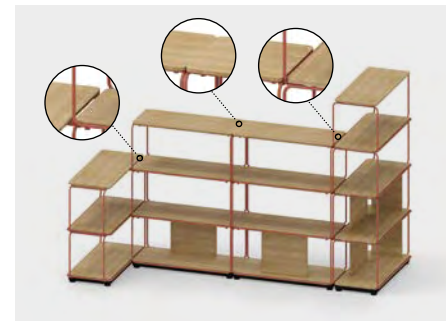

Position of screens

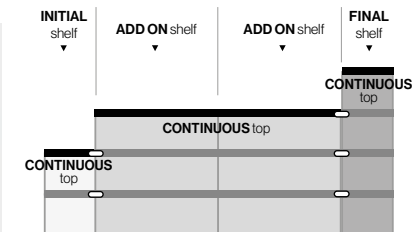

"L" configuration 2

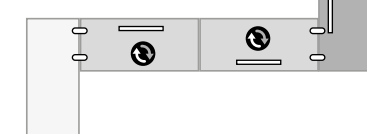

4 shelves combined

- 1 unit **PLB04 01** (Continuous top)
- 1 unit **PLB16 01** (Continuous top)
- 1 unit **PLB16 01** (Continuous top)
- 1 unit **PLB28 01** (Continuous top)
- 1 unit **PAC03** Joint kit "L" configuration

COMFORT AND OPTIMAL ACOUSTICS

Noray has an extensive product range with panels for every specific need. As a result we can have individual screens with or without casters, panels that can be linked or freestanding together with black boards and magnetic whiteboards.

Panels

Upholstered panel: 16 mm thick melamine board with 2 mm PVC thermofused edge. Board machined perimeter on the edge to allow upholstering the panel. Holes for mounting support legs, connectors and accessories. Textile cover made of 5 mm thick foam with a density of 60 kg / m³ and fabric. PP plastic profile sewn in the lower part to make the upholstery on the melamine support. PP bushings placed on the panel to facilitate the assembly of the legs and the connector system.

Pet panel: panel with acoustic properties made from PET (Polyethylene Terephthalate) from post-consumer recycled plastic bottles. The properties of this “fabric” give it a non-directional texture with a uniform colour throughout the panel. Well-defined edges add rigidity while being easy to cut to any shape. It can absorb indoor noise and effectively control the transmission in medium and high frequencies. It is suitable for applications that require noise absorption, volume reduction and echo suppression.

Bases

- **Aluminium legs:** aluminum legs with levellers or casters. AL 43400 injection mold aluminum parts painted with a smooth matte finish. Translucent PP floor levellers or 75 mm diameter casters with and without brake.
- **Wood legs:** solid oak wood leg with colorless varnish. Each leg consists of a U-shaped support and a 40 mm diameter lower crossbeam. Both parts are glued and linked by wooden dowels. The leg is attached to the panel by assembly screws.
- **Flat base:** Pre-assembled anchoring system, black-painted, consisting of two 3 mm thick steel plates and a lower fixing plate with M8 thread. The foot consists of a 6 mm thick laser-cut plate. It has a laser-cut and laser-welded trim. Epoxy paint according to available finishes. Adhesive lower gliders.

Panel with table

- **Top:** 16 mm thick MDF fiberboard. Covered with natural wood veneer with open pore and chamfer. Edge, upper and lower face of the board in the same finish, either lacquered or varnished. Inline roller UV varnished. With surface treatment by spraying with a water-based ultraviolet product. 100% ecological.
- **Wing:** 16 mm thick melamine particle board with perimeter machining on the edge to allow the panel to be upholstered and with the necessary holes for assembling hardware. Textile cover composed of 5 mm thick foam with a density of 60 kg/m³ and fabric.
- **Base:** painted base made of 6 mm thick steel plate. End caps made of self-adhesive felt. Base bolted to the panel with screws. Designed to maximise the stability of the table and support all the components. It can also be used to place objects on top and prevent them from touching the floor.

Technologic panel

Mobile panel with wheels and lower shelf with 3-socket power strip, with VESA 200 type support for TV sets with a maximum weight of 16 kg.

Connection mode: The TV and HDMI cables that connect to the TV are completely hidden. Once we connect these cables to the TV, they are inserted through the upper opening that communicates with the hole in the lower part of the panel and through which we can connect it to the strip located on the lower shelf. Finally, we connect the power strip directly to a power outlet.

Panel link system

The panel link system is made of plastic pieces mounted on the panel allowing angular adjustment in the different joints or even the joining of 3 panels. The system is made of different parts: knob (PP), cap (PP) and elastic bands. The system is mounted by screws.

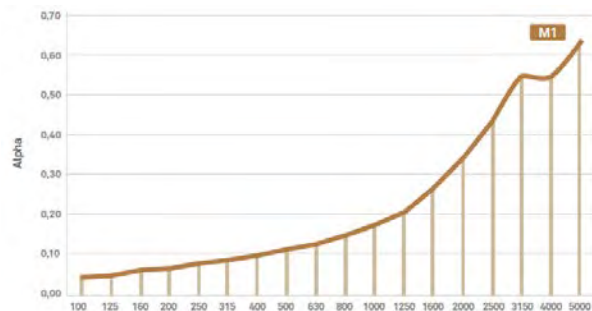

Accessories

- **1.5mm thick sheet metal whiteboard** fixed to the panel using M5x15 mm welded threaded bolts. Special paint for dry cleaning whiteboard markers. 2mm thick sheet steel pencil holder. Use ONLY dry-cleaning markers.
- **Lower shelf** in 23mm thick MDF board with lacquered chamfered edge.
- **Whiteboard** composed of a PET base + vinyl with two possible sizes, 60 x 45 cm and 90 x 60 cm. Designed to fit the upholstered multi-board system panel, with 4 through holes to attach the knobs.
- **Planter:** 1.2 mm thick steel sheet. Consists of two laser-cut pieces that have been folded, rounded and welded together. Magnetic panel fixing system.

Fonoabsorbency

Noray provides optimal sound absorption, thanks to its construction. Its panels are made up from a 16 mm particle board and then covered with 5 mm of high-density foam and upholstered on both sides. The absence of metallic interiors or profiles of other materials helps to absorb sound and provide an acoustic improvement in the space.

Normal incidence absorption coefficient by frequency (10534-2:2002) for prototype M1

Certificate

Our products are designed, manufactured and distributed according to current regulations and organizational standards.

Maintenance and cleaning of products

esPattio provides recommendations to the user so that their products always look new and in excellent condition.

As a general rule, we recommend the use of environmentally friendly cleaning agents. Please follow the cleaning product manufacturer's instructions.

Life cycle analysis

PN013

Raw Material	kg	%
Wood	15,37	74
Aluminium	3,16	15,24
Upholstery / Filling Material	2	9,6
Polypropilene	0,2	1

% Recycled Mat.= 68%

% Recyclable Mat.= 76,8%

Ecodesign

Results reached during the life cycle stages

Materials

- Steel: 15%-99% recycled material.
- Wood: 70% of the wood material is recycled, has PEFC/FSC and complies within the E1 standard.
- Plastic: 30%-40% recycled material.
- Powder painting without COV emissions.
- Staff material without HCFC and certified by Okotext.
- Upholsteries without COV emissions and certified by Okotext.
- Packings: 100% recyclable with inks with no solvents.

Production

- Raw materials use optimization. Board, upholstery and steel tubes cut.
- Renewable energies use, reducing the CO2 emissions (Photovoltaic pannels).
- Energy saving measures in all production process.
- COV global emission reduction of the production processes by 70%.
- Powder painting recovery of 93% of the non deposited painting.
- Glue removal from the upholstery.
- The facilities have an internal sewage for liquid waste.
- Green points at the factory.
- 100% waste recycling at production process and dangerous waste special treatment.

Transport

- Cardboard use optimization of the packings.
- Cardboard and packing materials use reduction.
- Flat packings and small bulks to optimize the space.
- Solid waste compacter which reduces transport and emissions.
- Light volumes and weights.
- Transport fleet renewal reducing by 28% the fuel consumption.
- Suppliers area reduction. Local market power and less pollution at transport.

Use

- Easy maintenance and cleaning without solvents.
- esPattio guarantee.
- The highest quality for materials to provide a 10 year average life of the product.
- Useful life optimization of the product due to a standardized and modular design.
- The boards with no E1 particle emission.

End life

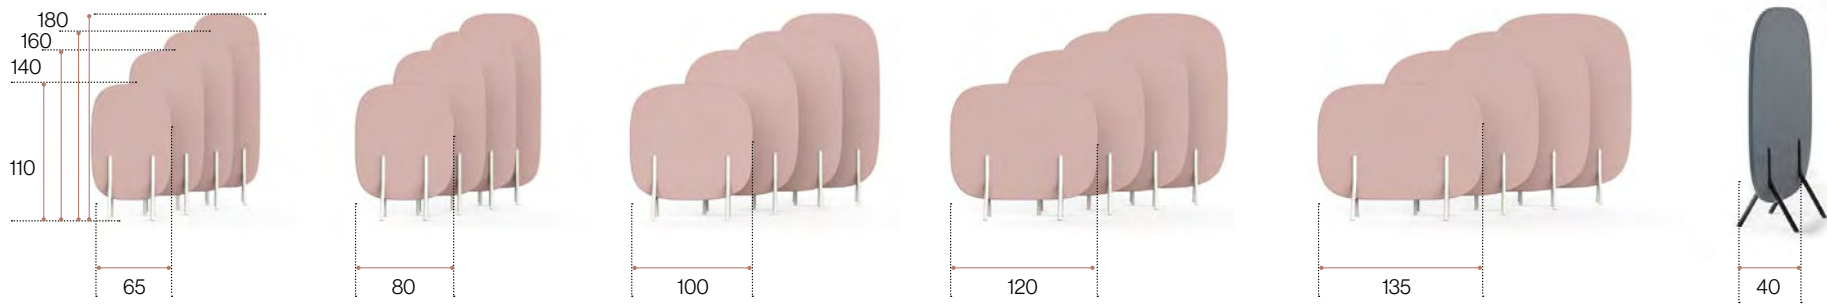

- Easy unpacking for the recyclability or compound reuse.
- Piece standarization for the use.
- Recycled materials used for products (% recyclability):
- Aluminium is 100% recyclable. Steel is 100% recyclable. Wood is 100% recyclable. Plastics are from 70 to 100% recyclable.
- With no air or water pollution while removing waste.
- Returnable, recyclable and reusable packing.

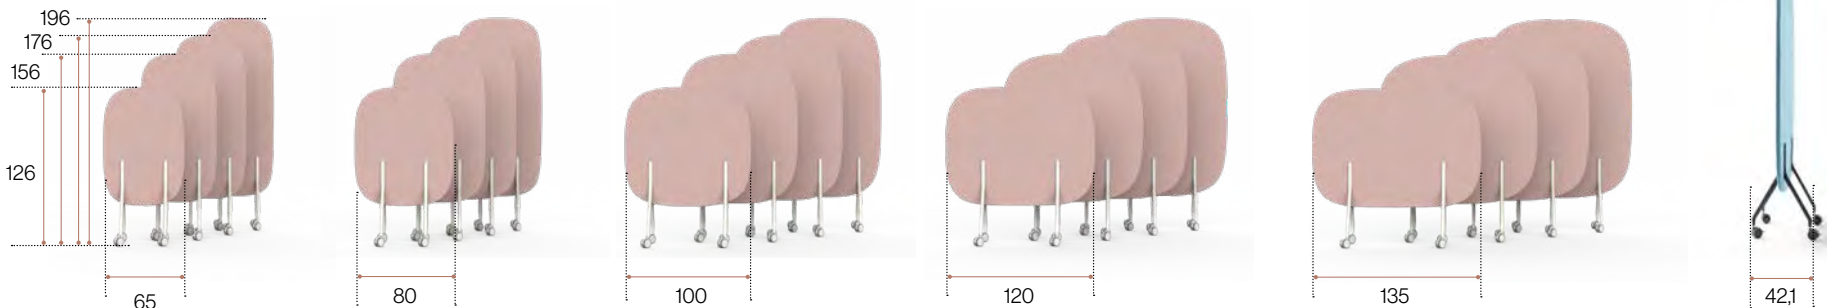

Dimensions

Without casters

The following measures can be applied to panels with aluminium legs, wood legs and flat base:

With casters*

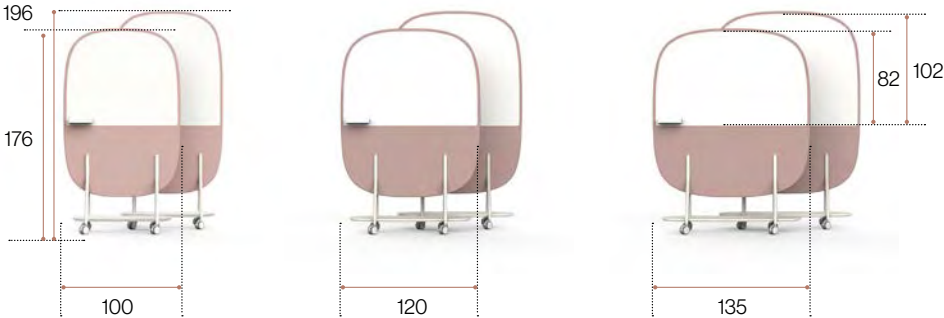

*Casters are only compatible with panels with aluminium legs.

	Aluminium / European wood legs	Flat base
h:110	2m	2,2m
h:140	2,5m	2,8m
h:160	3m	3,2m
h:180	3,5m	3,6m

Dimensions

P5

General sales terms

Fabric combinations

UPCHARGE 44,98 € / LINEAL METER

PVP + (Lineal meters x 44,98 €)

EXAMPLE

Disclaimer: these fabric combinations will have to be tested beforehand.

DIFFERENT GROUPS OF FABRICS

UPHOLSTERED G.5 – UPHOLSTERED G.6

In this case, the price will be of the upper group of both.

SBWG6

Inner shell (G.5 - VELVETY 214)

Outer shell (G.6 - CRISP 003)

1.092 € [SBWG6] + 2,35 m x 44,98 € = 1.197,70€

Note: the fabric meters each chair are shown in the table of DIMENSIONS  in every price list.
In case of any questions, please speak with the one of our representatives.

Customer fabric

In case of the customer supplies the fabric (customer fabric) the price of the chair or other upholstered items will always be the same that G2.

Disclaimer: not all fabrics are suitable for all products, consult your sales representative to confirm.

Types of fabric available and lead time

Available fabric types and lead times appear in each price list.

Colours not included in the esPattio swatch

Please consult the Customer Service Department about the technical feasibility of upholstering our different models of chairs and panels with special fabrics from Camira, Gabriel, Kvadrat or another supplier.

Fabrics that are not included in our upholstery swatch have a longer lead time. Please ask about this.

Relevant information

The references published in the upholstery sample of esPattio have a standard delivery time. For the rest of fabric colours not included on the esPattio sample, € 30 net will be charged per order lower to 10 units. For 10 or more units it will not be charged an extra price.

For the rest of supplier fabrics, the manufacturing will be special (please consult feasibility, lead time and price). For any question or inquiry, please contact the Technical-Commercial Department or Customer Service Department.

Packaging

In this pricelist you can find the packing data about weight, volume and number of items, close to the commercial references of the product. These data refer to the information of the basic product with standard options. For additional configurations, substract the total weight of the standard option and add the weight of the desired option.
All of esPattio products are delivered packed in boxes, except for the Bika chairs that are protected in a bag.
The design and material of the boxes is resistant and robust to ensure that the products arrive in perfect condition.

Weight: kilograms
Volume: m³
Items: unidades

The dimensions in this pricelist refer to centimeters unless otherwise noted.

The standard packaging for the markets with distribution with our logistics fleet will be delivered protected in a box. For international markets, chairs will be delivered protected in boxes.

Packaging is 100% recyclable. esPattio uses 100% recyclable packing materials, using also recycled raw materials in their boxes and plastics. The responsibility of the waste management belongs to the product final holder. Please, recycle the packaging material to collaborate actively with the environment.

PRODUCTION

Raw materials use optimization. Board, upholstery and steel tubes cut.
Renewable energies use reducing the CO2 emissions (photovoltaic pannels).
COV global emission reduction of the production processes by 70%.
100% waste recycling at production process ans dangerous waste special treatment.

TRANSPORT

Cardboard and packing materials use reduction.
Flat packings and small bulks to optimize the space.
Solid waste compacter which reduces transport and emissions.
Light volumes and weights
Suppliers area reduction. Local market power and less pollution at transport.

USE

Easy maintenance and cleaning without solvents.
esPattio provides a 5 year guarantee and up to 10 years for big projects.
The highest quality for materials to provide a 10 year average life of the product.
Useful life optimization of the product due to a standarized and modular design.
The boards with no E1 particle emission.

END LIFE

Easy unpacking for the recyclability or compound reuse.
Piece standarization for the use.
With no air or water pollution while removing waste.
Returnable, recyclable and reusable packing

Product: End of life

BASIC CONCEPTS

En In esPattio we design and produce our products so that their management during its end of life with the least possible impact on the environment. To do this, we spend much design effort to generate products whose components are easily identifiable and separable, in order to minimize the costs of recycling and facilitate the removal and treatment of them by authorized managers.

UPHOLSTERED PRODUCTS

They can be classified in two groups:

- Stand alone chairs
- Soft seating

The first group are composed of seats which utilise steel or aluminium in their main structure. Attached to this frame would be wood with polyurethane foam and fabric on the seat and back. The various materials can be separated easily for recycling purposes .

The second group are more substantial. The main elements are brought together in a traditional way by professional upholsterers. The main elements of wood ,foam and fabric are interwoven in a complex way .The component parts cannot be separated easily at the end of the products useful life. Little to no recycling is available and often ends up in landfill.

Removal is best through authorised waste managers and transferred to municipal collection points.

General sales terms

1. TRANSPORT

- Orders with price below **300 €** net will be charged with extra **60 €** net for transport.
- Freight paid with our own means, delivering the merchandise on truck foot, except in terms of INCOTERMS, previously defined between GRUPO FORMA 5 and dealer.
- Freight collect by agency, recharge for special packing.

2. SALES TERMS

2.1. ORDERS

- Once the order document has been recepcioned, this will be considered firm and the production process will begin. No change or modification of the order will be accepted without a previous and express authorisation by Grupo Forma 5, meanwhile there is no note on the document expressing the contrary.
- All orders will be placed through a written document, codes product and sent by fax or email, or any other way addressed to Grupo Forma 5.
The other documents will include a (its) order number or a (its) reference, in the case, to detect any duplicity possible mistake it may be caused.
- The orders processed and computerized at Forma 5 will adhere to the coding references that appear in this version of the Price List. In no case will an order be processed and computerized by the literal description of the product. The coding will always take precedence. Therefore, we recommend paying maximum attention to the coding according to the guidelines indicated in the tariff and, in case of any doubt that may arise, contact the Customer Service Department.

2.2. DELIVERY TIME

- ESTANDARD DELIVERY: it will be effective a 2-3 weeks time, after the order validation at Grupo Forma 5. The dealer will be able to negotiate an order expedition date within this period.
- DELIVERY FIXED BY THE DEALER: it will be effective in those cases when the dealer asks for the goods in a date after the 2-3 usual weeks. This date will be clearly specified in the order document and will be validated by the Customer Service Department.
- DELIVERY NEGOTIATED BETWEEN THE DEALER AND Grupo Forma 5: in some case, due to the order volume, the Customer Service Department will agree on the dates and delivery conditions together with the dealer in order to provide an efficient and quick service.

2.3. CLAIMS

- Any claim must come together with the waybill number and the delivery date. This information should be sent to the Sales Area Manager and Key Account from the Customer Service Department
- Any goods returns will not be accepted prior factory's authorization and must be accompanied by the collection order indicating he reasons and the anomaly.
- No material refunds will be accepted due to discoloration of upholsteries and veneer furniture.
- The deadline for stroke incidence is: 21 days for Spain and Portugal; 30 days for Francophone Market, UK and Ireland, and 60 days for other export markets. From the date of the delivery note.
- In case of wrong shipment it is necessary to have the erroneous reference label to make the the payment.

2.4. WARRANTY

Grupo Forma 5 warrants the products of Pattio and Forma 5 brand sold by it to be free of defects in material and workmanship, regardless of the number of shifts during which the products are used, for the warranty periods specified below.

Product warrant

- 5 Years executive desks, semi-executive desks, systems and task desks, storage and meeting tables.
- 5 Years visitor and multi-purpose chairs, task seating, executive chairs, contract and waiting areas and auditorium.

Exceptions

- 3 years mechanisms, gas lifts, bases and casters.

The warranty period runs from the date of purchase and applies only to products produced and manufactured by Grupo Forma 5.

During the applicable warranty period, Grupo Forma 5 will, as its sole obligation, repair or replace (at its option) any a product, part or component covered by this warranty and sold after the effective date of this warranty, which fails under normal use as a result of a defect in material or workmanship. Grupo Forma 5 will repair or replace the affected product, part or component with a comparable product, part or component with similar functionality under its criteria.

A claim under this warranty must be made during the applicable warranty period and for a product, part or component to be eligible for coverage under this warranty it must have been installed, used and maintained according to Grupo Forma 5's published instructions. Any modification of the original product voids the warranty and Grupo Forma 5 does not warranty the performance of the product when used in combination with anything other than original Grupo Forma 5 product.

This document inclusively describes all of the warranties given and remedies available with respect to the company's products and services. Grupo Forma 5 disclaim any other warranty whether express or implied, statutory or otherwise in relation to the products.

Exclusions

- Grupo Forma 5's warranty does not cover:
- Defect or failure resulting from abnormal wear;
- Tear;
- The product deterioration due to accidents;
- The material discoloration due to light exposure and natural aging;
- The matching of the colours, grains or textures of natural materials;
- The colourfastness or the matching of colours of textiles, including an exact match to cuttings, swatch cards, or printed or electronic reproductions;
- The purchaser's own fabrics (COM) or any other purchaser's supplied materials;
- Discolouration of textile due to soiling, stains, or dye transfer from clothing including denim.

In addition, the following features of natural materials are not considered defects and would not be dealt with under warranty:

- Changes in wood colour due to ageing or exposure to light;
- Natural variations in wood grain or figure or the presence of character marks;
- Marks, scars or wrinkles occurring in leather;

Grupo Forma 5 does not warranty products that are exposed to extreme environmental conditions or that have been subject to improper storage.

To the extent allowed by law, all conditions, warranties and representations, whether express or implied, statutory or otherwise, are excluded in relation to the products. To the extent they are legally required they are limited in duration to the duration of this written warranty.

Except as provided above, Grupo Forma 5 shall not be liable for any loss or damage or any costs be they direct, indirect, consequential, commercial or lost of profits however caused, that are incurred or suffered by the purchaser or any third party in respect of the products. However, nothing contained in this warranty will, or will be considered to, exclude or restrict any liability on the part of Grupo Forma 5 for death or personal injury resulting from its negligence.

2.5. DISCONTINUED PRODUCTS

Grupo Forma 5 reserves the right to discontinue products for technical, commercial or provider reasons. These discontinued products will be available while stocks last.

2.6. CANCELLATIONS AND CHANGE OF ORDERS

All orders will be considered as firm, from the moment it is received. No changes or cancellations will be admitted for any order after Grupo Forma 5 has processed them.

2.7. PAYMENT

The partial or total lack of payment of a bill will imply the immediate cessation of shipment of pending orders. All financial expenses caused by the lack of payment will always be borne by the buyer.

3. PROCESSING OF ORDERS

- Through our Sales Area Manager.
- By e-mail to our Customer Service Key Account.
- By fax: 954.93.00.58

4. OTHER TERMS

- V.A.T. not included in the prices of this price list.
- This price list cancels and replaces the previous ones. The information and prices on this rate are correct except typographical error or omission. In the case that some prices are corrected, due to a typo or due to an error in in our order management system, Grupo Forma 5 reserves the right to invoice again the products if it was necessary.
- Grupo Forma 5 reserves the right to modify specifications which do not accept the quality and provide aesthetic or functional improvements of all the products manufactured.
- In case of dispute or lawsuit, the handling of this is subject to the Courts and Tribunals of Seville.
- The application of the current price list will always be attached to the product delivery date and not to the product reception date.
- The images shown in this price list are only orientative and illustrative. The products real features are explained under each program's "Technical Features" section.
- The responsibility for the final waste management belongs to the product's final user. Consult our document "use and end of life" in our web.

[EN] Wood particle board, coated with pressure and temperature of natural veneer with open pore. The board has an optimum performance for further processing and complies with UNE EN-312 regulations. P2 Classification: dry indoor environment application and E1 Class: low formaldehyde content. Edge in wooden veneer. Treatment with polyurethane ivory lacquer finish with optimal extensibility and good toughness. The application of lacquer is done by mixed pistol with air and airless (without air), curtain machine.

[ES] Tablero de partículas de madera, recubierto mediante presión y temperatura de chapa de madera natural con poro abierto. El tablero tiene un comportamiento óptimo para la transformación posterior y cumple con la normativa UNE EN-312. Clasificación P2: aplicaciones de interior en ambiente seco y Clase E1: bajo contenido en formaldehído. Canto en chapa de madera. Tratamiento con laca de acabado poliuretánico marfil con una óptima extensibilidad y buena dureza. La aplicación del lacado se hace mediante la pulverización con pistola mixta con aire y airless (sin aire), máquina de cortina.

[FR] Panneau de particules en bois qui est recouvert avec pression et température de plaque de bois naturel pore ouvert. Le panneau présente un comportement optimal pour le transformer postérieurement et il accomplit la norme UNE EN-312. Classification P2 : applications d'intérieur en ambiance sèche et CLASE E1 : contenu bas en formaldéhyde. Chant en plaque de bois. Le panneau est traité postérieurement avec laque en polyuréthane ivoire avec une extensibilité optimale et une bonne dureté. L'application avec laque est réalisée avec pulvérisation avec pistolet mixte d'air et sans air, machine de rideaux.

[DE] Holzspanplatten, die unter Druck- und Wärmeeinwirkung mit offenporigem Furnier aus Naturholz beschichtet wurden. Diese Plattenart eignet sich optimal für die spätere Weiterverarbeitung und erfüllt die nach der Norm UNE EN-312 bestehenden Anforderungen. Klasse P2: Für die Anwendung in Innenräumen unter trockenen Bedingungen. Emissionsklasse E1: geringer Formaldehydgehalt. Die Kanten sind furniert. Endaufbereitung mit Polyurethanlack in der Farbe Elfenbein, der eine optimale Dehnbarkeit und eine angemessene Härte bietet. Der Lack wird mittels einer luftunterstützten Airless-Spritzpistole bzw. mit einer Airless-Pistole (ohne Luft) oder mit einem Vorhangbeschichter aufgetragen.

BEECH

Leg / Pata / Pied / Gestell

[EN] Beech is a semi-hard wood, straight grain with a density above 700 kg / m³. Beech has many advantages, it is used for furniture and fine woodwork as it can be carved, curved and turned.

[ES] Madera maciza de haya es una madera se-midura de fibra recta y grano fino de densidad por encima de 700 kg/m³. Entre otras aplicaciones, se utiliza para muebles y ebanistería fina ya que puede tallarse, curvarse y tornearse.

[FR] Le bois de hêtre massif est un bois mi-dur, à la fibre droite et au grain de densité fin, supérieur à 700 kg/m³. Il est utilisé, entre autres, pour les meubles et l'ébénisterie fine car il peut être taillé, recourbé et sculpté.

[DE] Das massive Buchenholz gehört zu den halbharten Hölzern. Seine Fasern verlaufen geradlinig, es ist feinkörnig und hat eine Dichte von über 700 kg/m³. Diese Holzart wird unter anderem für die Herstellung von Möbeln und für feine Tischlerarbeiten verwendet, weil es sich gut schneiden, biegen und drehen lässt.

EUROPEAN OAK / ROBLE EUROPEO /
CHÊNE EUROPÉEN / EUROPÄISCHE EICHE

Leg / Pata / Pied / Gestell

[EN] Solid oak wood has a straight or medium grain and a density of 740 kg / m³ at 12% humidity. It is so solid in can be used for both indoor and outdoor furniture.

[ES] Madera maciza de roble de fibra recta y grano medio de densidad aparente 740 kg/m³ al 12% de humedad. Utilizada entre otras aplicaciones para muebles de interior y exterior.

[FR] Bois de hêtre massif à fibre droite et au grain de densité apparente moyen de 740 kg/m³ à 12 % d'humidité. Utilisé, entre autres, pour les meubles d'intérieur et d'extérieur.

[DE] Das massive Eichenholz ist mittelkörnig, hat geradlinig verlaufende Fasern und eine Schüttdichte von 740 kg/m³ bei einer Feuchtigkeit von 12%. Es wird unter anderem für die Herstellung von Möbeln für Innenräume und Außenbereiche verwendet.

Top / Tapa / Plateau / Tischplatte

[EN] 16 mm thick DM fiber board. Covered by a porous wood veneer with chamfer. The edge and downside of the board have the same lacquered finish. Finished with in-line UV-cured varnish. Surface sprayed with a water-based ultraviolet product. 100% ecological.

[ES] Tablero de fibras DM de 16 mm de espesor. Recubierto de chapa de madera natural con poro abierto y chaflán. Canto y cara inferior del tablero lacado en el mismo acabado. Acabado con barnizado en línea de planos mediante rodillos con curado ultravioleta. Con tratamiento superficial por pulverización con producto ultravioleta base agua. 100% ecológico.

[FR] Plateau DM E16 mm recouvert d'un placage en bois naturel à pore ouvert et chant voile d'avion. Plateau est laqué entièrement (dessus, dessous, chants). Finition par vernis et traitement UV. Traitement superficiel par pulvérisation d'un produit UV à base aqueuse. 100 % écologique.

[DE] DM-Faserplatten mit einer Dicke von 16 mm. Beschichtet mit offenporigem Furnier aus Naturholz mit Schrägkanten. Die Kanten und Unterseiten der Platten sind in derselben Ausfertigungsart lackiert. Die Endbearbeitung der planebenen Flächen erfolgt durch Lackierung und UV-Härtung. Oberflächenausfertigung durch Besprühen mit 100% ökologischem UV-Lack auf Wasserbasis.

100.000
MARTINDALE CYCLES

[EN] Composition: 90% wool, 10% nylon. Width: 138 cm.
Abrasion resistance: 100,000 martindale cycles. Flame resistance: AS/NZS 1530.3, BS 5852 Crib 5 with treatment, BS 5852 part 1, EN 1021-1/2, IMO FTP Code 2010: Part 8, NF D 60 013, NFPA 260, Önorm B1/Q1, UNI 9175 1IM, US Cal. Bull. 117-2013. Light fastness: 5-7 (ISO 105-B02). Fastness to rubbing: wet: 4, dry: 4-5 (ISO). Pilling: 4 (EN ISO 12945). Maintenance : vacuuming and dry cleaning.

[ES] Composition: 90% lana, 10% nylon. Ancho: 138 cm.
Resistencia a la abrasión : 100.000 ciclos martindale. Resistencia al fuego: AS/NZS 1530.3, BS 5852 Crib 5 con tratamiento, BS 5852 part 1, EN 1021-1/2, IMO FTP Code 2010: Part 8, NF D 60 013, NFPA 260, Önorm B1/Q1, UNI 9175 1IM, US Cal. Bull. 117-2013. Solidez a la luz: 5-7 (ISO 105-B02). Solidez al rozamiento: Húmedo: 4, Seco: 4-5 (ISO). Pilling: 4 (EN ISO 12945). Limpieza: aspirar y limpiar en seco.

[FR] Composition : 90% laine, 10% nylon. Largeur : 138 cm.
Résistance à l'abrasion : 100.000 cycles martindale. Résistance au feu : AS/NZS 1530.3, BS 5852 Crib 5 avec traitement, BS 5852 part 1, EN 1021-1/2, IMO FTP Code 2010: Part 8, NF D 60 013, NFPA 260, Önorm B1/Q1, UNI 9175 1IM, US Cal. Bull. 117-2013. Solidité à la lumière : 5-7 (ISO 105-B02). Solidité au frottement : mouillé : 4, sec : 4-5 (ISO). Boulochage : 4 (EN ISO 12945). Nettoyage: aspirer et nettoyer à sec.

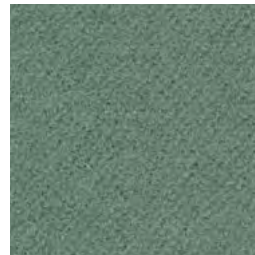

[DE] Zusammensetzung: 90% Wolle, 10% nylon. Breite: 138 cm. Scheuerfestigkeit: 100.000 Scheuertouren Martindale. Flammschutz: AS/NZS 1530.3, BS 5852 Crib 5 mit Ausrüstung, BS 5852 part 1, EN 1021-1/2, IMO FTP Code 2010: Part 8, NF D 60 013, NFPA 260, Önorm B1/Q1, UNI 9175 1IM, US Cal. Bull. 117-2013. Lichtechtheit: 5-7 (ISO 105-B02). Reibechtheit: nass: 4, trocken: 4-5 (ISO). Pilling: 4 (EN ISO 12945). Pflege: Staubsaugen und chemische Reinigung.

≥ 100.000
MARTINDALE CYCLES

[EN] Composition: 95% virgin wool, 5% polyamide. Abrasion resistance: ≥ 100.000 martindale cycles. Width: 140 cm. Flammability: EN 1021 - 1 (cigarette), EN 1021 - 2 (match), BS 7176 Low Hazard, NF D 60-013, ÖNORM B 3825 & A 3800-1 (58 kg/m³ CMHR foam), UNI 9175 Classe 1 IM, EN 13501-1 Adhered Class D, s1, d0, EN 13501-1 Un-adhered Class E, s2, d0. Flammability performance is dependent on components used. Light fastness: 5 (ISO 105 - B02) Fastness to rubbing: wet: 4, dry: 4 (ISO 105 - X12). Maintenance: vacuum regularly. Professionally dry clean or wipe clean with a damp cloth.

[ES] Composición: 95% lana virgen, 5% poliamida. Resistencia a la abrasión: ≥ 100.000 ciclos martindale. Ancho: 140 cm. Inflamabilidad: EN 1021 - 1 (cigarillo), EN 1021 - 2 (cerilla), BS 7176 Low Hazard, NF D 60-013, ÖNORM B 3825 & A 3800-1 (58 kg/m³ espuma CMHR), UNI 9175 Classe 1 IM, EN 13501-1 Adhered Class D, s1, d0, EN 13501-1 Un-adhered Class E, s2, d0. El rendimiento de la inflamabilidad depende de los componentes usados. Solidez a la luz: 5 (ISO 105 - B02). Solidez al rozamiento: húmedo: 4, seco: 4 (ISO 105 - X12). Limpieza: limpiar con aspirador con regularidad. Limpiar en seco, o bien lavar con un paño húmedo.

[FR] Composition : 95% laine vierge, 5% polyamide. Largeur : 140 cm. Résistance à l'abrasion : ≥ 100.000 cycles martindale. Flammabilité : EN 1021 - 1 (cigarette), EN 1021 - 2 (allumette), BS 7176 Low Hazard, NF D 60-013, ÖNORM B 3825 & A 3800-1 (58 kg/m³ CMHR mousse) UNI 9175 Classe 1 IM, EN 13501-1 Adhered Class D, s1, d0, EN 13501-1 Un-adhered Class E, s2, d0. La performance de flammabilité dépend des composantes utilisées. Solidité à la lumière : 5 (ISO 105 - B02). Solidité au frottement : mouillé : 4, sec : 4 (ISO 105 - X12). Nettoyage : aspirer régulièrement. Nettoyage à sec professionnel. Autrement, essuyer avec un tissu humide.

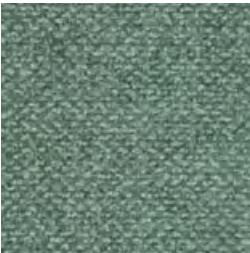

[DE] Zusammensetzung: 95% Schurwolle, 5% Polyamid. Breite: 140 cm. Scheuerfestigkeit: ≥ 100.000 Scheuertouren Martindale. Feuersicherung: EN 1021 - 1 (Zigarettentest), EN 1021 - 2 (Streichholztest), BS 7176 Low Hazard, NF D 60-013, ÖNORM B 3825 & A 3800-1 (58 kg/m³ CMHR Foam), UNI 9175 Classe 1 IM, EN 13501-1 Adhered Class D, s1, d0, EN 13501-1 Un-adhered Class E, s2, d0. Die Schwerentflammbarkeit hängt von den verwendeten Komponenten ab. Lichtechtheit: 5 (ISO 105 - B02). Reibechtheit: nass: 4, trocken: 4 (ISO 105 - X12). Pflege: Regelmäßig absaugen. Professionell chemisch reinigen oder mit einem feuchten Tuch abwischen.

[EN] Embossed cow leather. Pigment dyeing. Thickness: 0.9 – 1.1 mm. Approximate average size: 4.5 m². Determination of the pH difference index: > 3.5 ≤ 0.7pH (EN ISO 4045). Tear strength, average value: > 20 N (EN ISO 3377-1). Colour fastness to rubbing using back-and-forth cycles: wet 80 cycles: ≥3/4, dry 500 cycles: ≥4, sweat 50 cycles: ≥3/4. (ISO 11640/11641) grey scale. Colour fastness to artificial light: >5 blue scale (ISO 105-B02). Adhesion of the dry finish: ≥ 2.5 N / 10 mm (EN ISO 11644). Dry flex resistance: > 50,000 (EN ISO 5402-1). Fire performance: Source of ignition 0 (cigarette), Source of ignition 1 (match)(BS 5852-1: 79).

[ES] Piel bovina grabada. Tintura realizada con pigmentos. Espesor: 0,9 – 1,1 mm. Superficie media: 4,5 m². Determinación del pH Índice de diferencia: > 3,5 ≤ 0,7pH (EN ISO 4045). Resistencia al desgarro, valor medio: > 20 N (EN ISO 3377-1). Solidez del color al frote mediante ciclos de ida y vuelta: húmedo 80 ciclos: ≥3/4, seco 500 ciclos: ≥4, sudor 50 ciclos: ≥3/4. (ISO 11640/11641) escala grises. Solidez del color a la luz artificial: >5 escala azules (ISO 105-B02). Adhesión del acabado en seco: ≥ 2,5 N / 10 mm (EN ISO 11644). Resistencia a la flexión en seco: > 50.000 (EN ISO 5402-1). Comportamiento frente al fuego: Fuente de ignición 0 (cigarrillo), Fuente de Ignición 1 (cerilla)(BS 5852-1: 79).

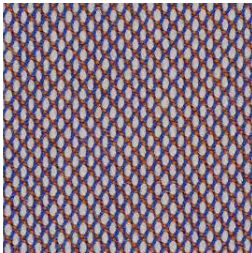

[FR] Cuir bovin gaufré. Teinture réalisée à base de pigments. Épaisseur: 0,9 – 1,1 mm. Surface moyenne: 4,5 m². Définition de l'index pH d'écart: > 3,5 ≤ 0,7pH (EN ISO 4045). Résistance à la déchirure, valeur moyenne: > 20 N (EN ISO 3377-1). Résistance de la couleur au frottement par cycles de va et vient: mouillé 80 cycles: ≥3/4, sec 500 cycles: ≥4, sueur 50 cycles: ≥3/4. (ISO 11640/11641) échelle de gris. Résistance de la couleur à la lumière artificielle: >5 échelle de bleue (ISO 105-B02). Adhésion de la finition à sec: ≥ 2,5 N / 10 mm (EN ISO 11644). Résistance à la flexion à sec: > 50.000 (EN ISO 5402-1). Comportement face au feu: point d'ignition 0 (cigarette), point d'ignition 1 (allumette) (BS 5852-1: 79).

[DE] Geprägtes Rindsleder. Pigmentfärbung. Dicke: 0,9 – 1,1 mm. Durchschnittliche Fläche: 4,5 m². Bestimmung des unterschiedlichen pH-Werts: > 3,5 ≤ 0,7pH (EN ISO 4045). Reißfestigkeit, Mittelwert: > 20 N (EN ISO 3377-1). Bestimmung der Abriebfestigkeit der Farbe durch Messung der Scheuertouren: nass 80 Zyklen: ≥3/4, trocken 500 Zyklen: ≥4, Schweiß 50 Zyklen: ≥3/4. (ISO 11640/11641) Grauskala. Farbbeständigkeit gegen Kunstlicht: >5 Blauskala (ISO 105-B02). Haftfestigkeit der Beschichtung im Trockenzustand: ≥ 2,5 N / 10 mm (EN ISO 11644). Biegefestigkeit im Trockenzustand: > 50.000 (EN ISO 5402-1). Brennverhalten: Zündquelle 0 (Zigarettentest), Zündquelle 1 (Streichholztest)(BS 5852-1: 79).

CLEANING & MAINTENANCE

Mantenimiento y limpieza de productos

Maintenance et nettoyage des produits

Wartung und renigung der Produkte

Pattio provides maintenance recommendations to the user to help preserve all our product ranges in great condition and to always make them look as new. We always recommend the use of environmentally friendly cleaning agents at all times.

Pattio aporta recomendaciones al usuario para que sus productos luzcan siempre un aspecto nuevo y en magníficas condiciones. Como norma general, recomendamos utilizar productos de limpieza que no dañen el medio ambiente. Siga las indicaciones del fabricante de los productos de limpieza.

Pattio fournit des recommandations à l'utilisateur afin qu'il puisse garder les produits comme au premier jour : aspect, éclat... Nous préconisons l'utilisation de produits de nettoyage respectueux de l'environnement. Suivez les indications du fabricant des produits d'entretien.

Pattio gibt dem Nutzer Empfehlungen an die Hand, damit seine Produkte immer wie neu aussehen und sich in hervorragendem Zustand befinden. Als Faustregel empfehlen wir, Reinigungsprodukte zu verwenden, die der Umwelt nicht schaden. Befolgen Sie die Hinweise der Reinigungsmittelhersteller.

Eco-advice

Eco-consejo

Notre éco conseil pour l'entretien de ce produit

Öko-Tipp

For cleaning, use water as the first option with a soft cloth. For stubborn stains use water with a neutral soap. This action will on its own reduce the environmental impact over the lifetime of the product by 91%. That is the effect on climate change through water pollution and the reduction of the ozone layer amongst others. Just using water should be sufficient to remove most stains and common dirt. Caring for the environment.

Para la limpieza, utilizar agua como primera opción en lugar de agua + jabón neutro ya que reduce en más de un 91% el impacto sobre el medio ambiente durante la etapa de uso del producto en indicadores como el cambio climático, la eutrofización del agua o la reducción de la capa de ozono, entre otros. La limpieza únicamente con agua resuelve muchas de las manchas y suciedad común. Miremos por el medio ambiente.

Le nettoyer uniquement avec de l'eau, sans ajouter de savon même neutre : cela réduira de plus de 91% l'impact de votre acte sur le climat, l'eau et la couche d'ozone, entre autres. Une eau claire et éventuellement tiède permet d'éliminer la majorité des taches les plus courantes dans un environnement tertiaire. Respectons et prenons soin de notre environnement !

Für die Reinigung kann reines Wasser verwendet werden, das einer Reinigung mit Wasser und Seife mit neutralem pH-Wert noch vorzuziehen ist, da auf diese Weise während des Gebrauchs dieses Produkts der Impact auf die Umwelt um mehr als 91% reduziert wird und Umweltproblemen, wie dem Klimawandel, der Eutrophierung der Gewässer und dem Abbau der Ozonschicht, entgegengewirkt wird. Auch reines Wasser kann schon viele Flecken und Schmutzreste gewöhnlicher Art beseitigen. Achten wir auf unsere Umwelt!

METAL

METAL / MÉTAL / METALL

EN

- Clean regularly with a dry cloth without fibre. In extreme case use a damp cloth with neutral pH soap.
- Do not wet the moving parts of certain products: pedestals, cabinets and chairs.
- The filing rails and drawer rails, chair castors and cabinet wheels should not be cleaned. Avoid water in these areas.
- The filing rails and drawer rails, chair castors and cabinet wheels should not be cleaned. Avoid water in these areas.
- For polished aluminium use a dry cotton cloth to restore its initial brightness conditions. For high-gloss chromed surfaces use a small amount of washing-up detergent. Then rub dry. Constant polishing will alter the metal finish by increasing the gloss level.

ES

- Limpie regularmente con un paño seco sin fibras. En casos extremos, utilice un paño húmedo impregnado en jabón pH neutro.
- No moje las partes móviles de determinados productos: bucs, armarios y sillas.
- Las guías deslizantes de los archivos y cajones, así como rodamientos de sillas y ruedas no deben ser limpiados ni engrasados. Evite que entre agua o humedad en estas zonas.
- Para las zonas de aluminio pulido, puede recuperar con pulimento sobre un paño de algodón seco para restablecer sus condiciones de brillo iniciales.
- Para superficies con cromado brillante utilice un poco de lavavajillas. Finalmente, secar frotando. Una limpieza constante puede alterar la superficie del metal: la pintura con el tiempo se volverá más brillante.

FR

- Nettoyer régulièrement avec un chiffon sec sans fibres. Dans les cas extrêmes, utiliser un chiffon humide imprégné de savon à pH neutre.
- Ne pas faire tremper les pièces mobiles de certains produits : caissons, armoires et chaises.
- Le rail de glissement des fichiers et des tiroirs, des chaises et des roulements de roues ne doivent pas être nettoyés ni graissés. Évitez l'eau et l'humidité entrer dans ces espaces.
- Pour les zones en aluminium poli, on peut récupérer avec pulimento sur un chiffon de coton sec pour rétablir les conditions d'éclat initial.
- Pour les surfaces en chrome brillant, utiliser du liquide vaisselle. Séchez ensuite. Si vous astiquez fortement votre meuble, la peinture risque à la longue de devenir plus brillante.

DE

- Regelmäßig mit trockenem Fasertuch reinigen. In Extremfällen, feuchtes, in PH-neutraler Seife eingeweichtes Tuch verwenden.
- Bewegliche Teile bestimmter Produkte nicht nass machen: Container, Schränke, Stühle.
- Die Gleitschienen von Archivschränken Und Schubladen sowie die Lager von Stühlen und Rollen sollten weder gereinigt noch gefettet werden. Wasser und Feuchtigkeit in diesen Bereichen vermeiden.
- Poliertes Aluminium kann mit einem trockenen Baumwolltuch wieder zum Glänzen gebracht werden.
- Für Oberflächen mit glänzender Verchromung verwenden Sie etwas Geschirrspülmittel. Danach trocken reiben.
- Ständige Reinigung kann die Metalloberfläche verändern: die Farbe wird mit der Zeit glänzender. Sie können alternativ Trockenschaum für Teppiche verwenden.

POLYPROPYLENE & LACQUERED WOOD

POLIPROPILENO Y MADERA LACADO / POLYPROPYLÈNE ET BOIS LAQUÉ / POLYPROPYLENE UND LACKIERT

EN Clean regularly with a damp cloth moistened with neutral pH soap.

ES Limpie regularmente con un paño húmedo impregnado en jabón pH neutro.

FR Nettoyer régulièrement avec un chiffon humide imprégné de savon à pH neutre.

DE Regelmäßig mit trockenem, faserfreiem Tuch reinigen. In Extremfällen, feuchtes, in PH-neutraler Seife eingeweichtes Tuch verwenden.

WOOD

MADERA / BOIS / HOLZ

EN

- For regular maintenance, wood veneer surfaces should be cleaned using a damp cloth and a mild detergent or a commercial product suitable for the treatment of wood, then dried with a soft lint-free cloth.
- Remember to always follow the advice of the cleaning detergent manufacturer. Do not use any form of furniture polish on wood veneer surfaces as this will result in smearing. E-clothes are recommended for this purpose.
- Remember to clean always in the direction of the grain.
- In case of liquid spills or stains, follow the instructions below:
Water: clean with a soft cloth or sponge (this will help absorb the water instantly)
Drinks: clean with a damp cloth and later dry with a soft lint-free cloth.
Glue, Permanent ink, others: Please refer to a professional.

RECOMMENDATIONS

- Protect the wood veneer surfaces to desks: Use desk mats to prevent scratches from the daily used work elements such as computers, notepads, electronic accessories, etc.
- Do not drag objects through the surface of the desk, always lift objects.
- Avoid placing glasses or cups directly to the desks. Cold, wet or hot drink containers can damage the grain of the wood finish and leave stains. Please always use leather coasters and pads (never silicone or rubber covered coasters).
- If liquids are accidentally spilled on the desk surface please wipe immediately with a damp cloth and later dry it with a soft lint-free cloth.
- Never use paper towels for cleaning the wood veneer surfaces.
- Prevent the wood veneer furniture to be exposed directly to the sunlight as the wood finish can vary its colour tones to light or dark. This is an inevitable natural process but avoiding the direct sunlight can prevent this prompt aging of the wood and colour tones variation.
- Ensure no silicone or rubber objects are left on the desk surface as this affects the finish. Also, try to move sporadically the work elements so that the process of "aging" occurs in all areas equally.
- Protect the veneer furniture to be exposed to high temperatures or humidity both in the transportation and in the work space where it is installed.

ES

- Para un mantenimiento periódico, frote con un paño húmedo impregnado en jabón pH neutro o utilice un producto comercial apto para el tratamiento de la madera.
- Recuerde frotar siempre en la misma dirección de la veta.
- En caso de derrame o mancha, siga las siguientes instrucciones:
Agua: absorba con un paño o esponja.
Bebidas: limpie con un paño húmedo y séquelo posteriormente.
Tinta permanente: utilice alcohol. Repita cuantas veces sea necesario.
Pegamento, esmalte: normalmente puede limpiarse con acetona (consulte con un profesional).

RECOMENDACIONES

- Proteja la superficie de la mesa: utilice vades y protectores de escritorio para evitar arañazos de los elementos que más se emplean diariamente (ordenador, zona de escritura, ratón).
- Evite arrastrar los objetos por la superficie de la mesa: en la medida de lo posible, levante siempre los objetos.
- Evite colocar vasos y tazas directamente sobre la mesa. Los elementos húmedos, fríos o calientes debilitan los poros de la madera, dañando el acabado y creando surcos y manchas. Para ello, utilice posavasos y alfombrillas de cuero (nunca con recubrimiento de plástico gomoso).
- Évitez de placer les verres et les tasses directement sur la table. Les éléments humides, froids ou chauds affaiblissent le bois en endommageant la finition et en créant des sillons et des tâches. Pour ce faire, utilisez des verres avec une base en cuir et des tapis (jamais en plastique caoutchouteux couché).
- En el caso de que se derrame algún líquido sobre el mueble, séquelo con un paño al instante.
- Nunca utilice paños de papel para el mantenimiento o la limpieza de la madera.
- Evite exponer el mueble directamente a la luz del sol pues la madera, al ser un elemento "vivo", modifica el tono y sus colores, pudiéndose volver más claras u oscuras. Es un proceso inevitable, pero así podrá impedir un envejecimiento prematuro de la madera.
- Procure no dejar objetos de plástico gomoso en la mesa, pues afecta al acabado. Además, procure mover periódicamente los elementos de su mesa para que el proceso de "envejecimiento" se produzca por todas las zonas por igual.
- Evite que el mueble esté expuesto a temperaturas y humedades extremas, tanto en el transporte como en el lugar en el que es instalado.

WOOD

MADERA / BOIS / HOLZ

FR

- Pour l'entretien régulier, essuyez avec un chiffon humide imprégné d'un savon de pH neutre ou utiliser un produit commercial approprié pour le traitement du bois.
- N'oubliez pas de toujours nettoyer dans le sens du grain, du veinage.
- Dans le cas de liquide ou d'une tâche, suivez les instructions suivantes:
Eau : essuyez et absorbez avec un chiffon ou une éponge.
Boissons : nettoyer avec un chiffon humide, puis séchez.
Encre permanente : utilisez de l'alcool ménager. Répétez l'opération si nécessaire.
Colle, vernis : généralement peut-être nettoyé avec de l'acétone (consulter un professionnel).

RECOMMENDATIONS

- Protéger la surface de la table : utiliser blocs-notes et protections de bureau pour éviter les éraflures du mobilier qui s'emploient plus quotidiennement (ordinateur, sous-main, souris).
- Ne pas faire glisser des objets sur la surface de la table dans la mesure du possible, toujours soulever des objets.
- Évitez de placer les verres et les tasses directement sur la table. Les éléments humides, froids ou chauds affaiblissent le bois en endommageant la finition et en créant des sillons et des tâches.. Pour ce faire, utilisez des verres avec une base en cuir et des tapis (jamais en plastique caoutchouteux couché).
- Dans le cas où un liquide se répand sur le meuble, l'essuyer immédiatement avec un tissu doux.
- Ne jamais utiliser des serviettes en papier pour le nettoyage ou l'entretien du bois.
- Évitez d'exposer vos meubles aux rayons directs du soleil car le bois est un élément "vivant", et sa teinte et ses couleurs peuvent devenir plus claires ou plus sombres encore. Il s'agit d'un processus inévitable, mais on peut ralentir le vieillissement prématuré du bois.
- Évitez d'avoir des objets en plastique caoutchouteux sur la table, car ils affectent la finition. De même, essayez de déplacer périodiquement les éléments de votre mobilier afin que le processus de «vieillessement» se produise sur l'intégralité de la superficie du meuble.
- Évitez que le mobilier soit exposé à des températures extrêmes et à l'humidité, aussi bien durant le transport que sur le site il est installé.

DE

- Pflegen Sie den Tisch regelmäßig, indem Sie ihn mit einem feuchten Tuch und pH-neutraler Seife abwischen oder ein kommerzielles Produkt zur Holzpflege verwenden.
- Denken Sie daran, immer in Maserungsrichtung zu wischen.
- Bei Verschütten von Flüssigkeiten oder Flecken befolgen Sie diese Hinweise:
Wasser: durch ein Tuch oder einen Schwamm aufsaugen lassen.
Getränke: mit einem feuchten Tuch reinigen und dann trocknen.
Permanente Tinte: verwenden Sie Alkohol. Wiederholen Sie den Vorgang, solange notwendig.
Kleber, Lack: kann normalerweise mit Aceton gereinigt werden (Experten konsultieren).

EMPFEHLUNGEN

- Tischoberfläche schützen: verwenden Sie Schreibtisch- und Schutzunterlagen, um die Oberfläche vor Kratzern durch Dinge des täglichen Gebrauchs zu schützen (Computer, Tastatur, Maus).
- Ziehen Sie keine Gegenstände über die Tischoberfläche: wenn möglich, heben Sie die Gegenstände zum Bewegen an.
- Stellen Sie keine Gläser oder Tassen direkt auf die Tischoberfläche. Feuchte Kälte oder warme Gegenstände schwächen die Holzporen, schädigen die Beschichtung und es entstehen Furchen und Flecken. Verwenden Sie einen Untersetzer und Lederunterlagen (niemals mit gummiertem Plastik).
- Sollte Flüssigkeit auf dem Tisch verschüttet werden, trocknen Sie diesen sofort mit einem Tuch.
- Verwenden Sie niemals Papiertücher für die Pflege und Reinigung des Holzes.
- Stellen Sie das Möbel nicht direkt in die Sonne. Das Holz verändert, da es sich um "lebendes" Material handelt, Ton und Farbe und könnte dadurch heller/dunkler werden. Das ist ein unvermeidbarer Vorgang, doch so wird eine vorzeitige Alterung des Holzes vermieden.
- Stellen Sie keine Kunststoff/Gummi –Gegenstände auf den Tisch, diese beeinträchtigen die Beschichtung. Stellen Sie die Gegenstände auf dem Tisch regelmäßig um, damit der Alterungsprozess überall gleich verläuft.
- Setzen Sie den Tisch keinen extremen Temperaturen und Feuchtigkeiten aus, weder während des Transports, noch am Ort der Installation.

FENIX

EN

- Use any household cleaner or just warm water
- Always end by rinsing with warm water
- Dry with a clean cloth to avoid limescale residue
- Don't use abrasive cream
- Don't use a scouring pad or hard brush (you can use a melamine sponge)

ES

- Utilizar cualquier producto de limpieza doméstica o simplemente agua caliente
- Siempre enjuagar con agua caliente
- Secar con un paño limpio para evitar que queden partículas de cal
- No usar cremas abrasivas
- No usar estropajos ni cepillos duros (se puede usar una esponja de melamina)

FR

- Utiliser n'importe quel nettoyant ménager ou de l'eau chaude
- Toujours terminer par un rinçage à l'eau chaude
- Sécher avec un chiffon propre pour éviter les résidus de calcaire
- Ne pas utiliser de crème abrasive
- Ne pas utiliser de tampon à récurer ou de brosse dure (vous pouvez utiliser une éponge en mélamine).

DE

- Verwenden Sie einen beliebigen Haushaltsreiniger oder nur warmes Wasser
- Spülen Sie immer mit warmem Wasser nach
- Mit einem sauberen Tuch abtrocknen, um Kalkrückstände zu vermeiden
- Verwenden Sie keine Scheuermilch
- Verwenden Sie keinen Scheuerschwamm oder eine harte Bürste (Sie können einen Melaminschwamm verwenden)

DEKTON

EN

- Apply neutral soap to the affected area and gently rub in a circular motion with a damp microfibre cloth.
- Leave to work for a couple of minutes. Then, with a cloth, wipe off any soap residue. Finally, dry it with kitchen roll.

ES

- Aplicar jabón neutro sobre la zona afectada y frotar suavemente de manera circular utilizando una esponja húmeda de microfibra.
- Dejar actuar un par de minutos y pasar una bayeta para eliminar cualquier resto de jabón. Después secar con papel de cocina.

FR

- Appliquer du savon neutre sur la zone touchée et frotter doucement en mouvement circulaire avec un chiffon humide en microfibre.
- Laisser agir quelques minutes. Ensuite, essuyer avec un chiffon tous les résidus de savon. Enfin, sécher avec du papier absorbant.

DE

- Tragen Sie neutrale Seife auf die betroffene Stelle auf und reiben Sie sie mit einem feuchten Mikrofasertuch in kreisenden Bewegungen sanft ab.
- Lassen Sie es einige Minuten lang einwirken. Wischen Sie dann die restliche Seife mit einem Tuch ab. Trocknen Sie die Stelle dann mit Küchenpapier.

FABRICS

TAPICERÍAS / TISSUS / POLSTERUNG

[EN] Maintenance of upholstery according to the type of fabric. See information in the technical features section of this catalogue. If you need more information, please consult the provider's website.

Mr. Rubén Fernández Parrado, with an I.D. card DNI 77.800.859-R, as Chief Executive Officer of GRUPO FORMA 5, S.L.u., V.A.T. number B-91.252.593 and address in Acueducto, 12-14, E-41703 Dos Hermanas (Seville).

CERTIFIES

That Grupo Forma 5's products meet the most stringent ergonomic standards regarding size, strength and stability. Grupo Forma 5 has a Quality Department which, in coordination with the Department of R + D + i, check that all products coming to market do so under satisfactory conditions.

That the Grupo Forma 5's products are covered by 5 years warranty against manufacturing defects, excluding those produced by misuse of the furniture.

That GRUPO FORMA 5, S.L.u. will manufacture all the programs during the next 7 years and will provide support of spare parts for minimum of 9 years after date of supply.

Exclusions:

Grupo Forma 5's warranty does not cover:

- the colourfastness or the matching of colours of our fabrics, when they are compared with cuttings, swatch cards, or printed or electronic reproductions;
- the purchaser's own fabrics (COM) or any other purchaser's supplied materials;
- any defect or failure resulting from common using
- the matching of the colours, grains or textures when they come from natural materials;
- any consumable products;

In addition, the following features of natural materials are not considered defects and would not be dealt with under warranty:

- any natural changes in wood grain or figure or the presence of character marks;
- any kind of mark, wrinkle or scar in leather;
- any variation in wood colour due to the exposition of our product to the sunlight or the age of it

Grupo Forma 5 does not warranty products that are exposed to extreme environmental conditions or that have been subject to improper use or storage.

Any other type of warranty will need to be requested formally to a representative of Grupo Forma 5.

Dos Hermanas - Seville - Spain in March 11, 2024.

DIFFERENTIATE YOUR CUSTOMERS

PRODUCT CUSTOMIZATION

Forma 5 esPattio

BACKGROUND

To achieve a strong brand presence, some end customers ask to customise their workspaces. Institutional bodies also incorporate the logos of their section or ministry into the furniture.

Therefore, to offer new solutions, we use standardised a process so that our products can include customised logos on labels and some surfaces by laser engraving, giving each project something exclusive.

In this document we will go through the process to follow to request this kind of customised, to which products it will be applied and what the delivery times are.

WHAT

Customise the product
with **your customer's logo**.

HOW

We use **laser technology**
to engrave a high-definition
logo.

FOR WHAT

We want to give you the tools
to **differentiate** yourself and
offer **greater value to your
customer.**

WHY

Customisation **links the
product to the customer**
and makes it **unique,
special.**

ENGRAVING SAMPLES

LEATHER LABEL

TOP ACCESS

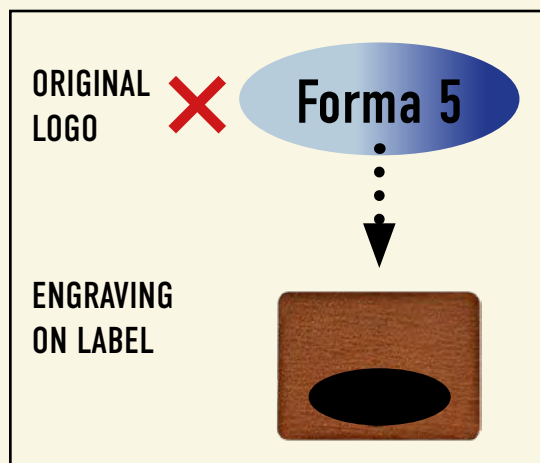

TECHNICAL ASPECTS TO BEAR IN MIND

The logo must be rendered as vectors to ensure high-quality engraving.

The minimum font size is 6 pt.

FORMAT AVAILABLE:
ai, pdf

The gradation cannot be expressed. For example,

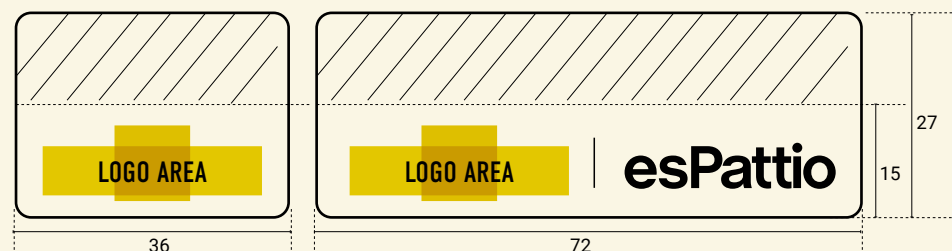

The logo must have no colour or background gradation, that is, it must be flat.

LEATHER LABEL: 36 x 27 mm / 72 x 27 mm

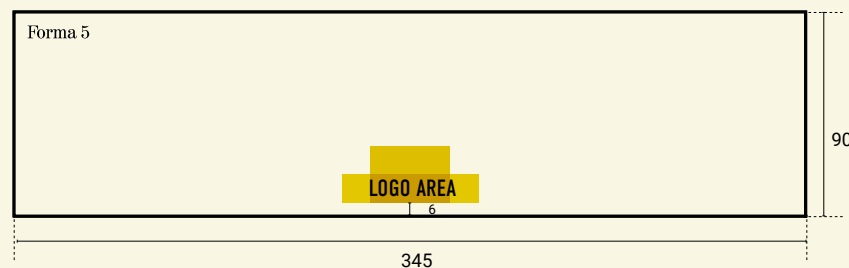

VISIBLE PART OF THE LABEL: 36 x 15 mm / 72 x 15 mm

LOGO AREA: 29 x 6,5 mm ó 10 x 10 mm aprox.

TOP ACCESS COVER: 349 x 90 mm

LOGO AREA: 60 x 13 mm ó 35 x 25 mm aprox.

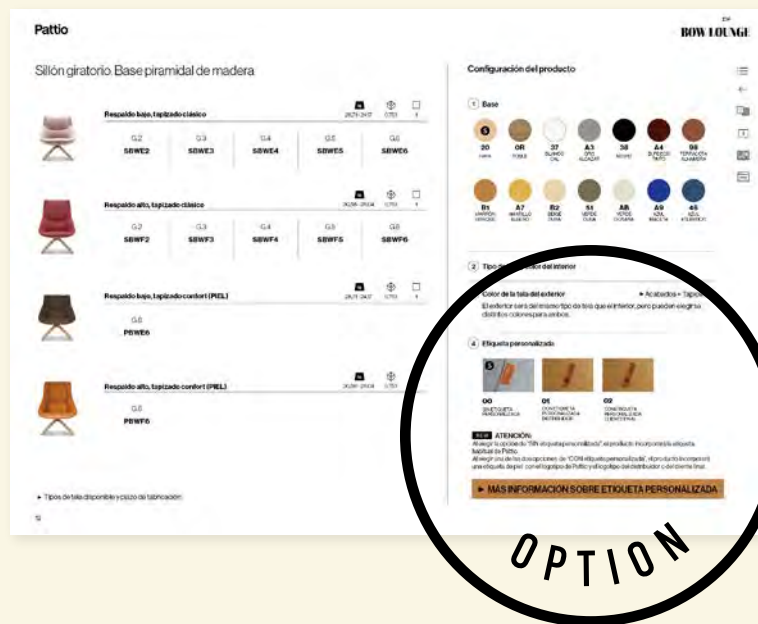

HOW TO ORDER YOUR CUSTOMISED PRODUCT

The procedure we have designed to be able to incorporate into the orders this kind of customised products will make it possible to automate in a repeat order the coding required for these products without having to use the specials process.

STEP 1

Select the product to be customised on the price list and code it completely including the Customised Product option:
Delivery times for customised products will also be set out with the price in each case.

STEP 2

When you send your order, please attach a file with the vectorised logo to be included in the customisation. If different logotypes for different products are included in the same order, the every logotype file must be named with the commercial code of the product where the logo shall be applied.

Forma 5

HOW TO ORDER YOUR CUSTOMISED PRODUCT

STEP 3

You will receive a document with the digital simulation of the label and the customised product so that you may confirm your acceptance by email.
