PCR01  
Moka  
Mokka

PCR02  
Caramello  
Caramel

infiniti takes this opportunity, creating a very special version of **Canova**, **Tondina** and **Pure Loop** in two colors: **caramel** and **mokka**. Thanks to the production technique and the different plastic compositions, the final effect on the product will always be different from one chair to another, even if they will be mass-produced.

Treatment for post-consumer plastic waste in EU 28+2 / Source: Consorzio Market & Strategy Smith, 2018 data

# EASTWOOD

by Andreas Ostwald

In the new Eastwood chair, a solid ash structure meets polypropylene, creating an intriguing intersection of sinuous lines. The slightly curved back panel looks gently resting on the frame, maximizing comfort. The color palette for the seat and back panels makes Eastwood matchable to any classic and modern setting.

# SICLA

by Claus Breinholt

Sicla is a rigid “bucket” chair, made of a comfortable lightweight and thin shell. To provide strength the edges along the shell have been curved. To avoid the “hollow” sensation of the shape, a rib was inserted around the back of the chair, leading out into the armrest and giving stability.

# EKKI

by mC.dsg

mC.dsg wants to pay homage to early twentieth century designers with Ekki, a chair with a retro design. It's enriched by contemporary elements such as the metal beams placed on the back side of the rectangular backrest, and the visible assembly components.

# FELUCA

by BrogliatoTraverso

The feluca (“becorn hat” in english) is an ancient headgear used in the eighteenth century and characterized by two downward curved extremities. It is no coincidence if BrogliatoTraverso chose this name for their new chair, since its backward has a shape that strongly reminds of it. This design gives a sense of movement to its profile, erasing any rigidity and enhancing harmony and refinement.

# RELIEF

## by Favaretto&Partners

The Relief family widens: the version with the polypropylene shell, supported by different bases, is now available with upholstered seat or seat and back upholstery. The family is completed by a new version with a solid ash frame, with or without arms, which also supports full upholstery.

The line extension includes:

- solid wooden structure with and without armrests (which supports full upholstery)
- seat and back upholstered panels
