technical properties	given that in nature there is no existing material which is completely unaffected by atmospheric factors, this coat stand is to be considered suitable for outdoor use having shown only slight superficial changes when subjected to the corrosion resistance test of 500 hours exposure in a salt spray chamber; however is not suitable for use in swimming pools and saunas , where the atmosphere is loaded with chlorine, because specific antibacterial substances used for the routine sanitisation of fittings can cause powerful aggressive reactions capable, in the long period, of damaging its surface.
